* This striped bass population migrates annually between West Point Lake and Morgan Falls Dam.

†† Women who are pregnant or nursing and young children may wish to further restrict their consumption due to the variable mercury levels in these fish.

KING MACKEREL SPECIAL JOINT STATE CONSUMPTION GUIDANCE ISSUED BY GEORGIA, NORTH CAROLINA, SOUTH CAROLINA AND FLORIDA FOR SOUTH ATLANTIC OCEAN	
SIZE RANGE (FORK LENGTH, INCHES)	RECOMMENDATIONS FOR MEAL CONSUMPTION OF KING MACKEREL CAUGHT OFFSHORE GEORGIA COAST
24 to less than 33 inches	No Restrictions
33 to 39 inches	1 meal per month for pregnant women, nursing mothers and children age 12 and younger
	1 meal per week for other adults
Over 39 inches	Do Not Eat

Saltwater Advisory

Harmful toxins called PCBs are stored in the hepatopancreas ("the green gland" also known as the mustard, tomalley, or liver) found in the body section of blue crabs.

Recent studies have shown that crabs in the Middle Turtle River and Purvis and Gibson Creeks contain high levels of PCBs. While the crab meat may still be eaten in recommended amounts, the hepatopancreas should not be eaten because of the high PCB levels.

If crabs are cooked whole, the juice should not be consumed. Because PCBs are transferred to cooking liquid, crab cooking liquid should also be discarded.

Cleaning crabs before you cook them ("backing" the crabs and rinsing out the guts and the gills) reduces the risk of consuming PCBs.

Good Fishing Depends on Clean Water

Many of our rivers, lakes, and coastal areas are experiencing algae blooms that cover our favorite fishing spots with green slime and cause fish kills and "dead zones" where no aquatic life can survive. The cause is usually nitrogen and phosphorus pollution that comes from farm and lawn fertilizers, septic systems, animal waste, and sewage treatment plants. Here's what you can do to keep the water clean:

- Take care not to over fertilize
- Pick up pet waste and properly manage waste from livestock
- Use green practices: rain barrels, rain gardens, and permeable pavements
- Maintain septic systems
- Encourage your community to invest

Supporting water quality protection supports great fishing!
