

CLEAN, DRAIN AND DRY!

HELP PROTECT NEVADA'S WATERS

Stop the spread of aquatic hitchhikers! **Clean, Drain and Dry** your:

Waders

Fishing Gear

Canoes/Kayaks

Buckets

Boats

Fishing Poles

If it gets wet, it could harbor Aquatic Invasive Species.

KNOWN NEVADA INVADERS

Quagga Mussels

Eurasian Watermilfoil

New Zealand Mudsnail

NorthernPike

INSPECT AND DECONTAMINATE YOUR WATERCRAFT AND EQUIPMENT

Here are some methods to minimize your chances of accidentally transporting invasive species. By following these steps you can help protect your valuable fishing and boating resources for the future:

- **CLEAN** Remove all mud, plants and animals from every part of your boat, trailer and equipment.
- **DRAIN** Before you leave the recreation area, eliminate all water from your boat, including its live-wells, ballast, hull and engine-cooling water. Remove all drain plugs and leave passages open before transporting your boat away from any waterbody.
- **DRY** Allow time for your boat to completely dry before you launch in any other waters. This amount of time may vary depending on humidity and temperature. In the summer, your dry time should be at least seven days.

NOTE: When transferring your watercraft from one water to another or across state borders, you may be required to have your watercraft inspected or decontaminated. For additional information, visit www.100thmeridian.org or visit the wildlife/fish and game website of your destination state.

- **NEVER** release plants, fish or animals into a body of water unless they came out of that body of water.
