DIRECTOR'S MESSAGE

Have you ever watched chukar cover ground? It's seldom in a straight path. Sometimes they zigzag uphill through rocks and crevices; sometimes they flush and glide swiftly sideways over ridges and through sagebrush; sometimes they divebomb straight downhill; and sometimes they sit completely still and silent, waiting for the perfect time to make their unpredictable escape attempt.

Chances are if you're reading this, you've witnessed chukar or other game birds and their often-unpredictable antics. There's much we can learn from them. Not just patience and perseverance while hunting them, but how their unpredictability relates to other aspects of life.

Much like the chukar's flight, the gamebird populations in this state rise and fall, boom and bust, and sometimes hover unmoving, potentially leaving us surprised at the direction they move next. These variations in population exist largely due to Mother Nature's influence on habitat conditions, feed availability, and the severity of our winters. Living in the driest state in the U.S. presents Nevada with a host of unique challenges each year, especially during drought years such as this. The resulting wildfires can have devastating effects on the sagebrush biome, and in turn, game bird populations.

These ebbs and flows are simply a part of living in our desert state. NDOW's responsible game management is necessary to maintain healthy game bird populations, and while we can't control Mother Nature, we strive to do the best we can to give wildlife populations of all shapes and sizes a competitive edge. This includes using science and data to determine the best courses of action, whether it be reseeding habitat after a wildfire or flying water into remote guzzlers during the summer's most unforgiving heatwaves.

Keeping Nevada's wildlife wild and abundant is the most important aspect that we at the Nevada Department of Wildlife strive for. We understand that there are natural rises and falls in the state's wildlife populations, and we do our best to keep the falls to a minimum while we are always poised to take fullest advantage of Mother nature's benefits when they are present.

Because much like life, the chukar's sometimes chaotic movements can lead us down paths (or in the case of chukar hunting, up giant, steep mountains) we didn't expect or weren't ready for, but everything tends to work itself out in the end. Although the Great Basin in Nevada is presently challenged by extreme drought, excessive numbers of feral horses and burros, and invasive species and wildfire, we remain poised to rebound when Mother Nature again smiles upon us. Hang tough!

Sincerely,

Tony Wasley
Director, Nevada Department of Wildlife

Those who draw a tag have seven days to electronically return their tag to the Department.

Tags can be returned to the Department up to one day before the start of the hunt for a bonus point refund.

Tags returned to the Department will be issued to an available alternate, available to be won in the second draw, and finally available for purchase in the First-Come-First-Served program. (Refer to NAC 502.4215)

Depending on the circumstances surrounding a hunter's inability to hunt on a tag, that person can choose to defer that tag to the next year's season or receive a refund of bonus points. (Refer to NAC 502.422)

Tag holders who are diagnosed as terminally ill can choose to transfer their tag to certain family members. (Refer to NAC 502.422)

An applicant who is unsuccessful in a draw may return the purchased hunting license for a refund if the license was purchased solely to apply for a tag. Bonus points will not be awarded if a license is returned (Refer to NAC 502.4225)

APPRENTICE HUNTING LICENSE

The apprentice must have never previously held a hunting license and always be accompanied by a mentor hunter 18 or older who holds a valid Nevada hunting license and a mentor affidavit. The license is free, but the apprentice must pay associated fees and purchase any applicable stamps. The license is only available at NDOW offices.

HUNTERS MUST RESPECT PRIVATE PROPERTY

Nevada is more than eighty percent public land, almost all of it open to hunting, but some sportsmen still mistakenly enter private property. The Nevada Department of Wildlife (NDOW) receives reports every year of hunters trespassing, damaging private property and even releasing livestock from pastures or private property.

"Trespassing is a real problem and something we take very seriously," said Mike Maynard, Chief Game Warden for NDOW. "In all my

years as a game warden I have found that nearly all of these problems could have been avoided if people had used a little common sense while out in the field."

The Nevada Department of Wildlife wants to remind everyone that hunting on someone else's land is a privilege, not a right. Common courtesy can go a long way towards establishing good hunter-landowner relations in the future. Refer to NRS 207.200 for more information.

TRESPASS DEFINITION

It is considered trespassing if a person willfully goes on or remains on any land after having been warned by the owner or occupant not to trespass. This "warning" can include the following:

- Painting with fluorescent orange paint on the following:
 - » A structure or natural object or the top 12 inches of a post, at intervals of such a distance as is necessary to ensure that it is within the direct line of sight of a person standing next to another such structure, natural object or post.
 - » Each side of all gates, cattle guards and openings that are designed to allow human ingress to the area;
- Fencing the area;
- Posting "no trespassing" signs or other notice of like meaning at intervals of such a distance as is necessary to ensure that at least one such sign would be within the direct line of sight of a person standing next to another such sign, and each corner of the land.
- Using the area as cultivated land. "Cultivated land" means land that has been cleared of its natural vegetation and is presently planted with a crop.

TIPS TO USE WHEN HUNTING ON PRIVATE PROPERTY:

- Access to and across private lands is a privilege granted by the landowner. Not all roads are public roads. Traveling on private roads without permission to access other lands is akin to someone walking through your house to reach a neighbor's home.
- Bring a good map showing private and public land ownership. Know where you are. Internet map sources may not be very accurate and there may be no cell service in rural areas.
- Build good relationships with land owners by asking permission.
- Leave gates the way you find them and make sure everyone in your party knows that. If a rancher wants a gate left open, it will be hung back on the fence, not lying on the ground.
- Leave the land better than you find it – pick up all trash you find and take it with you.
- Camp away from water sources for the benefit of wildlife and livestock.
- Report hunter misconduct. Misbehaving hunters jeopardize the use of resources for all hunters.
- Stay on existing roads.
- When granted access, bring only the number of hunters expected by your host.
- Respect locked gates, no trespassing signs and orange-painted gate posts. They all mean stay out.
- Do not attempt to remove or relocate livestock or wildlife.
- Send a thank you note.

REGULATIONS

UPLAND GAME BIRD, RABBIT, DOVE, AND CROW

In Nevada, upland game bird species include dusky, sooty, and ruffed grouse; sage grouse; chukar and Hungarian partridge; Himalayan snowcock; ring-necked pheasant; California, Gambel's, and mountain quail; and North American wild turkey.

Small game species include cottontail, pygmy, and white-tailed jackrabbits. Falconry seasons are in effect for waterfowl (all migratory bird stamp requirements apply), dove, chukar, sage, blue and ruffed grouse, pheasant, Himalayan snowcock, Hungarian partridge, quail, and rabbit.

Youth seasons include chukar and Hungarian partridge, California and Gambel's quail, and cottontail, pygmy, and white-tailed jackrabbits.

NRS 502.010 AS IT PERTAINS TO UPLAND GAME YOUTH HUNTS

- A license to hunt or fish is not required of a resident of this State who is younger than 12;
- It is unlawful for any child who is younger than 18 to hunt any wildlife with any firearm unless the child is accompanied at all times by the child's parent or guardian or is accompanied at all times by an adult person authorized by the child's parent or guardian to have control or custody of the child to hunt if the authorized person is also licensed to hunt.

SMALL GAME HUNT QUESTIONNAIRE

The small game hunt questionnaire (upland game birds, rabbits, and waterfowl) can be found online in February of each year at ndowlicensing.com. Even though this is a voluntary questionnaire, we encourage those sportsmen that pursue these species to do their best to track their hunting excursions in terms of number of days hunted, what county they hunted in and how many animals were taken. These surveys typically close around the end of April. This information is instrumental in helping the Nevada Department of Wildlife determine harvest estimates each year and make recommendations for upcoming seasons and bag limits.

SAGE GROUSE

The Nevada Department of Wildlife is conducting a long-term study of the state's sage grouse populations and is collecting wing samples to help determine the status of the sage grouse population in Nevada. Sage grouse hunters are asked to remove one wing from each sage grouse taken. This diagram illustrates where the wing should be cut.

Please keep the wing dry and away from flies. A paper lunch bag works well. Deposit the wing at any of the Department's wing barrels, at check stations, or with Department employees who contact you in the field.

BLACKBIRD

The crow (17.5 inches) is bigger than a blackbird (9 inches) and noticeably smaller than a raven (24 inches). Crows often flock, while ravens are more solitary birds. Note that the crow's bill is much smaller than the raven, and that its tail is square. The raven's heavy bill, shaggy throat feathers and wedge-shaped tail also set it apart from the common crow.

RABBIT HEMORRHAGIC DISEASE TYPE 2

- Rabbit Hemorrhagic Disease Virus – 2 (RHDV2) is a highly contagious and lethal disease of rabbits.
- RHDV2 is a foreign animal disease and was first detected in domestic and wild rabbits of North American in the spring of 2020 in the desert southwest.
- Humans are not susceptible to the disease; however, they can transport in on clothing and equipment, including vehicles
- Please report any mortalities of multiple cottontails or jackrabbits, any mortality of pika or pygmy rabbits, and any mortality with blood coming from the nose or mouth without obvious trauma.
- Report mortalities to the NDOW veterinarian (Dr. Nate LaHue) at nate.lahue@ndow.org or contact (775) 688-1500.
- Do not handle sick or dead wild rabbits that you suspect may have died from this virus and dispose of unwanted rabbit carcass parts in a landfill or at the site of harvest.
- Do not let pets (e.g. hunting dogs) come into contact with dead rabbits.

BLUE GROUSE (DUSKY AND SOOTY GROUSE)

Range in size from 15 to 20 inches and weigh from 26 to 46 oz. Dusky grouse inhabit central Nevada from around Austin, east to the Nevada/Utah border and north to the Idaho/Nevada border. Sooty grouse inhabit extreme western Nevada along the California/Nevada border in mountain ranges such as the Carson Range, Sweetwater and White Mountains.

CHUKAR PARTRIDGE

Nevada's most popular upland game bird. Widely distributed across the state and much of the Great Basin. Coloration is grayish brown with a buff belly. Chestnut and black barring on flanks with a black line through eye connecting at the throat. Length is 13.4 to 15 in and weighs from 19-27 oz. Inhabits steep, rocky habitat exemplified by talus slopes and cliffs.

RUFFED GROUSE

Reddish-brown or gray with dark bars and spots. Weighs between 16 and 26 oz. and is much smaller than a blue grouse. Translocated populations exist in northeastern, central and portions of northwestern Nevada.

RING-NECKED PHEASANT

Males are a strikingly beautiful bird with a distinctive green iridescent neck, red face and white collar around the base of the neck. The body has a copper coloration with black spots and the tail is long and pointed with black barring. The female is dull brown in coloration with black spotting on the sides and a shorter tail than the males. Ranges in size from 19.7-27.6 in in length and weighs from 17.6-105.8 oz.

HUNGARIAN PARTRIDGE

Officially known as the "Gray Partridge". Ranges in size from 11.8 to 13 inches in length and from 13.6 to 17.6 oz. Grayish brown with chestnut barring on wings, dark reddish U-shaped patch on belly and a reddish throat patch.

HIMALAYAN SNOWCOCK

A large upland game bird introduced into Nevada in 1963. Ranges in size from 22-29 inches and weighs from 4.4 to 6.8 lbs. Gray in color with a white throat and chestnut stripes on the sides of the head. Sexes are monomorphic except for size where the female is smaller in stature. Only exists in Nevada's Ruby Mountains and East Humboldt Range in North America.

GREATER SAGE-GROUSE

The mating display of sage-grouse is very distinctive as the males inflate large yellow air sacs surrounded by white pin feathers and create a series of odd plops and swishing sounds. Males also fan out their spiny tail feathers during the display. Their coloration closely resembles their habitat with a grayish brown appearance and white mottling throughout. Males can be almost twice as large as females. Range in size from 22-29.5 inches in length and weigh between 3.1-6.4 lbs. Lifespan is from 3-6 years with females tending to be longer lived than males.

MOUNTAIN QUAIL

The top knot of this species is straight and long compared to California or Gambel's quail. Chestnut throat patch and chestnut flanks with white bars are distinctive of this species. Ranges in length from 10.2 to 12.2 inches and weight from 6.7-9.2 oz.

GAMBEL'S QUAIL

Distribution in Nevada includes Clark, Lincoln and Nye Counties. Similar in color pattern and size to California quail, but male Gambel's quail have a prominent black belly patch. Range in length from 13.4-14.2 in. and weigh between 5.6-7.1 oz.

CALIFORNIA QUAIL

Length is from 9.4 to 10.6 inches and weighs in at 5-8 oz. Males are distinguishable from females by the black face outlined in bold white stripes and the larger, comma shaped head plume or "top knot" while females are plainer brown and lack the facial markings and have a relatively shorter and fairly straight top knot.

WHITE-TAILED JACKRABBIT

This species is often mistakenly called a "Snowshoe" rabbit. The summer pelt coloration is brownish with some black and can appear gray in color. This species turns white in the winter, but maintains the black tips on its ears. The tail is white, which is a distinguishing characteristic that differs it from the more common black-tailed jackrabbit. This is the largest rabbit in Nevada and is between 22 to 26 in. in length and weighs between 6.6 to 13 lbs.

COTTONTAIL RABBIT

Nevada has two species of cottontail rabbits, mountain cottontail and desert cottontail. Ranges in size from 14 to 17 in. in length and weighs from 1.5 to 2.6 lbs. The ears are relatively short compared to jackrabbits and are smaller in size. The feet of cottontails are densely covered in fur. Overall coloration is pale brown with black-tipped ears, a white underside and white to grayish white tail.

PYGMY RABBIT

A sagebrush dependent species relegated to the sagebrush range in the western U.S. The world's smallest leporid that weighs between 0.8 and 1.1 lb. and ranges in length from 9.3 to 11.6 inches. Has short ears, gray color, small hind legs and has no white fur on tail, a distinguishing characteristic from cottontail rabbits.

REGULATIONS

MIGRATORY GAME BIRD

In Nevada, migratory game bird seasons are established for ducks and mergansers, coots and common gallinules, snipe, Canada and white fronted geese, snow geese and Ross' geese. Migratory waterfowl are a subgroup of migratory game birds, and include ducks, mergansers, geese, and swans.

STAMP REQUIREMENTS

A Federal Migratory Game Bird Hunting Stamp (\$27 at ndowlicensing.com) is required for any person age 16 or older who hunts any migratory waterfowl (ducks, mergansers, geese, and swans).

Note: Shotguns must be plugged to limit overall shotshell capacity to 3 when hunting all migratory birds. (Note: See Snow and Ross' geese season for exception.)

SPECIES ID

Head or fully feathered wing must remain attached to bird while in transit from the field to the hunter's residence for ducks, mergansers, coots and common gallinules, snipe, geese, and swan.

HIP NUMBER

Any person, except a Nevada resident under 12, who plans to hunt any kind of migratory game bird, including ducks, geese, swans, coots, dove, snipe, or common gallinules in Nevada this year, is required to ANNUALLY obtain a Harvest Information Program (HIP) validation number and write it on their hunting license before entering the field. The validation number is free and is available by going online to ndowlicensing.com or calling 1-855-542-6369. The U.S. Fish and Wildlife Service is conducting the nationwide harvest survey.

Additionally, NDOW would like migratory bird hunters to complete an online questionnaire at the conclusion of the season.

SMALL GAME HUNT SURVEYS

The small game hunt questionnaire (upland game birds, rabbits, and waterfowl) can be found online in February of each year at ndowlicensing.com. Even though this is a voluntary questionnaire, we encourage those sportsmen that pursue these species to do their best to track their hunting excursions in terms of number of days hunted, what county they hunted in and how many animals were taken. These surveys typically close around the end of April. This information is instrumental in helping the Nevada Department of Wildlife determine harvest estimates each year and make recommendations for upcoming seasons and bag limits.

MID-SEASON CLOSURES

- Northeast Zone closed Oct. 14-22
- Northwest Zone closed Jan. 3-4
- South Zone closed Oct. 25-26

FEDERAL MIGRATORY BIRD STAMP

The Federal Migratory Bird Stamp is now an electronic stamp privilege. The physical stamps are NO LONGER available at NDOW offices or NDOW license agents that sold them in the past. However, the US post offices will continue to sell the physical stamp. You can purchase your electronic Federal Migratory Bird Stamp privilege at the NDOW Online Consumer site (ndowlicensing.com), at NDOW offices, and from most license agents. The privilege is valid for 45 days to allow for receipt of the physical Federal Migratory Bird stamp in the mail from the USFWS. Once the physical stamp is received it must be signed and affixed to the license. For assistance, contact NDOW's License Office at Toll Free 855-542-6369.

FALCONRY LICENSE

A person must possess a valid falconer's license when practicing falconry. A person who releases a raptor at game birds or game animals during the open season must also possess a valid hunting license. Additionally, when hunting waterfowl, hunters must possess a federal migratory bird stamp.

HIP NUMBER

Any person, except a Nevada resident under 12, who plans to hunt any kind of migratory game bird, including ducks, geese, swans, coots, dove, snipe, or common gallinules in Nevada this year, is required to ANNUALLY obtain a Harvest Information Program (HIP) validation number and write it on their hunting license before entering the field. The validation number is free and is available by going online at ndowlicensing.com or by calling 1-855-542-6369. The U.S. Fish and Wildlife Service is conducting the nationwide harvest survey. Additionally, NDOW would like migratory bird hunters to complete an online questionnaire at the conclusion of the season.

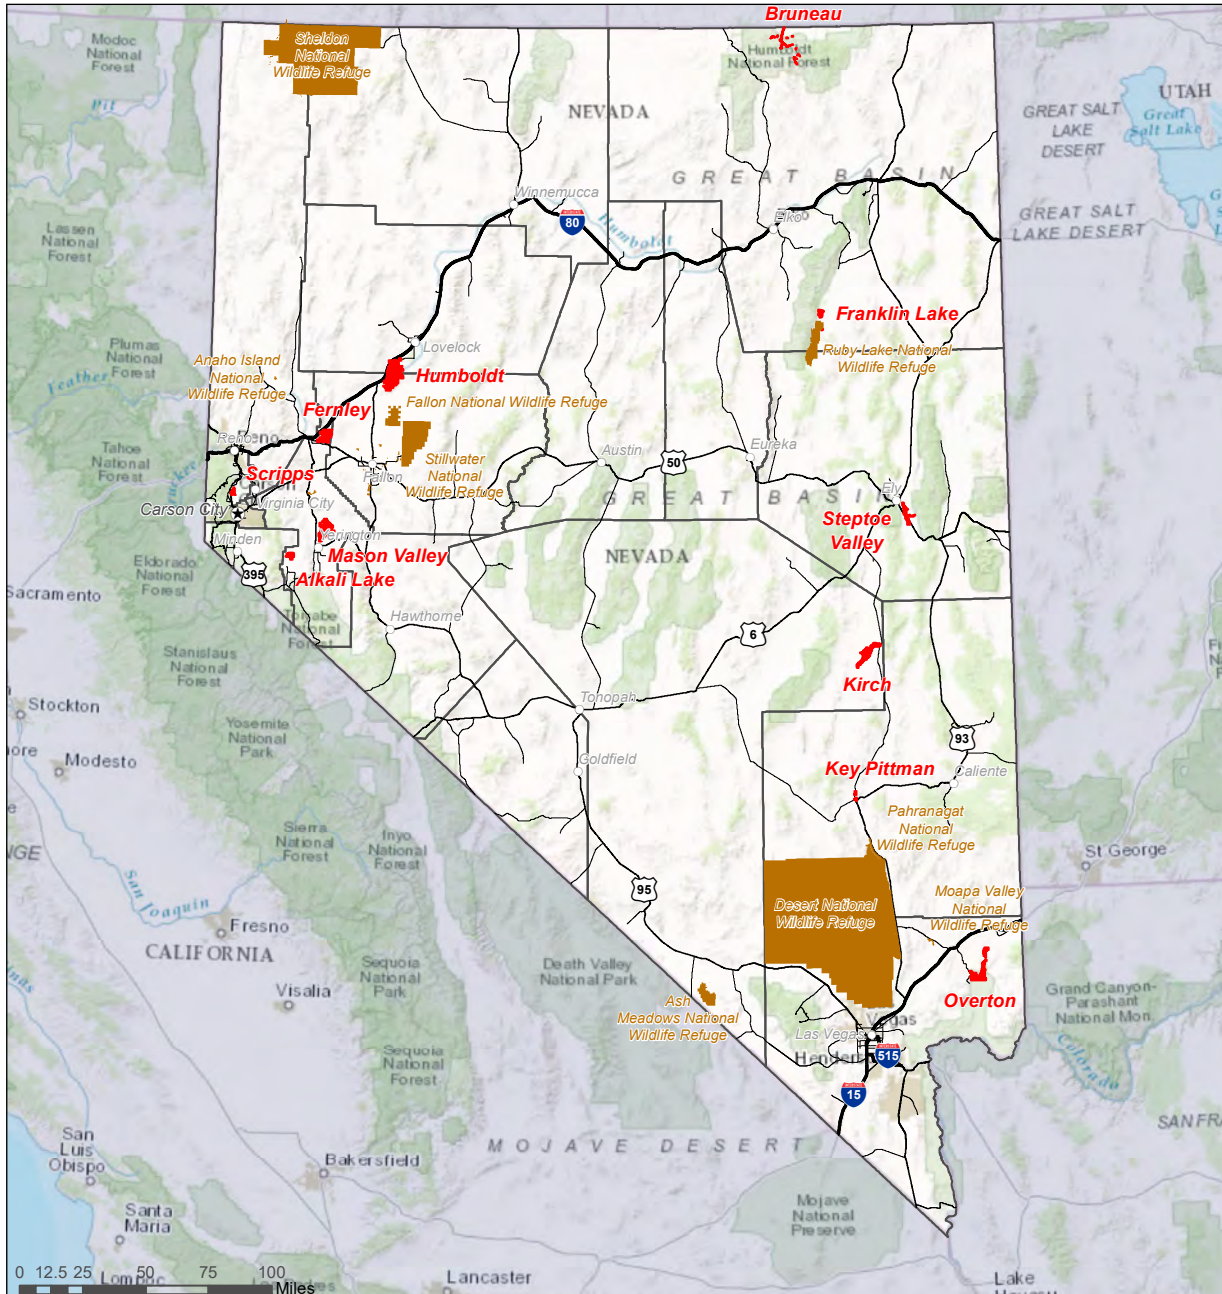

PRACTICE OF FALCONRY

When practicing falconry on game species, a falconry licensee shall comply with the provisions of title 45 of NRS and all regulations of the Commission. A species of wildlife which is classified as protected and further classified as threatened or endangered by the Commission, or as threatened or endangered by the United States Fish and Wildlife Service, that is taken incidentally by a raptor may not be retained or possessed by a falconry licensee and the falconry licensee shall report the taking to the United States Fish and Wildlife Service not later than 72 hours after the taking. A species of wildlife which is classified as a game species by the Department that is taken incidentally by a raptor during the closed season may not be retained or possessed by the falconry licensee, except that the falconry licensee may allow the raptor to feed on the game species. A falconry licensee shall not intentionally release a raptor after any wildlife which is in a refuge or in a state or national park or is on privately owned property where the falconry licensee does not have permission to hunt. A falconry licensee may fly a raptor at an animal raised in captivity and at any species of

bird that is not listed as a protected species by the Migratory Bird Treaty Act, as amended, 16 U.S.C. §§ 703 et seq. (**Note:** A complete list of falconry regulations can be found at ndow.org under the "Laws & Regulations" section.) (Refer to NAC 503.210)

REPORT WILDLIFE CRIME WITH NEW "NDOW TIP" APP

"NDOW Tip" allows the public to report information on wildlife crime or suspicious activity via a new free smartphone app.

- Send a report through the app or connect directly to the Operation Game Thief (OGT) hotline.
- Download the app on your iPhone or Android through app stores.
- Send in pictures or video to the department.
- "NDOW Tip" also includes links to the OGT website that includes information on what to look for and what information to report.

COMMON VIOLATIONS

The vast majority of hunters, trappers, and anglers do their best to abide by the wildlife laws and regulations. For those people who fail to follow the law, convictions of wildlife law may carry serious penalties, including criminal fines up to \$5,000, jail, civil penalties up to \$30,000, loss of equipment and lost license privileges.

The following are a list of the seven most common violations in the field. Check twice, take due care, and you can avoid unnecessary citations, costly fines and loss of equipment and hunting privileges.

If you make a mistake — for example shooting a spike, or small forked-horn deer instead of an antlerless deer — report it immediately to the local game warden or *Operation Game Thief (OGT)* at 1-800-992-3030. Follow any instructions that are provided to you and wait for the warden to arrive. Taking the opposite approach, such as hiding or wasting game, will carry much more serious consequences.

1. Loaded Rifle or Shotgun In/On Vehicle

Nevada law prohibits carrying loaded rifles and shotguns in or on vehicles, including ATVs, motorcycles, and snowmobiles. After hunting on foot, unload the gun before placing it in or on the vehicle. **This is a misdemeanor offense.**

2. Using Tag of Another

This is a surprisingly common violation. Only the person named on the tag may use or possess the tag. **This violation is considered a felony offense if an animal is harvested.**

3. License and Tag Fraud

Providing false information (for example, claiming to be a Nevada resident, using a false date of birth, or fictitious name, etc.) to obtain a license is a **misdemeanor**. Providing false information to obtain a big game tag is a **gross misdemeanor**, and killing a big game mammal with such a tag is a felony. This activity steals tags from lawful sportsmen.

4. Early/Late Shooting

Do not shoot at game before or after the designated legal hunting hours. Check the sunset/sunrise and hunts by species table. Sunset does not mean dark! (Refer to legal hunting hours by species on page 45. Also see sunrise/sunset tables pages 45–48. **This is a misdemeanor offense.**

5. Failure to Properly Punch Tag or Permit Immediately After Taking Game

Upon reaching game, **immediately** validate (punch) the tag or permit with a knife or other sharp object. Marking it with a pencil or pen is not acceptable. **This is a misdemeanor offense.**

If a tag is used to kill more than one animal, the crime is punishable as a category E felony and all equipment used in the crime is subject to forfeiture, including guns and vehicles.

6. Possessing an Over Limit of a Species

Possession Limit is the maximum number of a species that one person can legally take and control at any one time—this includes animals held in the freezer and ice chest. **Daily Limit is the maximum number of a species that is allowed to be harvested in any given day.**

7. Unplugged Shotgun

Waterfowl and dove hunters may not use shotguns capable of holding more than three shells. Shotguns must be plugged and rendered incapable of holding more than three shells. **Shotguns must also be plugged in all Wildlife Management Areas regardless of species. This is a misdemeanor offense.**

The following authorized NDOW license agents listed below have been issued a supply of transportation permits. Please call the one closest to your hunting area to verify that they still have a supply on hand before

you go in. Transportation permits are also available at all NDOW offices statewide (see page 3).

BLM INFORMATION

The Bureau of Land Management (BLM) in Nevada encourages hunters to call in advance of hunting season to find out if land management practices will be conducted during the hunting season. While BLM field offices are aware of hunting seasons, some management activities, such as prescribed burns, wild horse gathers, road closures or fire restrictions may temporarily disrupt hunting activities.

Call Before You Hunt

If possible, call the appropriate BLM office before you send in your hunt area requests. That way you may avoid an area that may have some access restrictions or other changes because of management activities. It's a good idea to call BLM just before the hunt to find out if any unplanned restrictions from fire or emergency wild horse gathers are in effect.

Responsible Hunting in Wilderness and Wilderness Study Areas (WSAs)

Some units contain BLM lands designated as wilderness or wilderness study areas. Motor vehicle use—trucks, ATVs and motorcycles—is not allowed unless signs are placed to indicate a designated route. The motorized vehicle rule extends to mechanized vehicles such as game carriers, which are also not allowed in these areas. Hand-held GPS units are allowed.

Responsible Off-Highway Vehicle Use

There has been a big increase in the use of OHVs by hunters. While most areas of the public lands are designated as open to OHV use, cross-country travel on OHVs is causing unnecessary damage to habitat that wildlife depend on. OHV riders are asked to stay on existing roads and trails. If it is necessary to drive off roads to retrieve and pack out harvested game, hunters are asked to use care and avoid creating new routes.

HOW TO USE THESE TABLES

Many Nevada hunting regulations restrict the activities to specific times. The laws and regulations may specify sunrise to sunset, one half hour before sunrise to sunset, one hour before sunrise to two hours before sunset, etc.

Consult the specific regulation pamphlet for the activity you are interested in. These are available at all NDOW offices and most license agents. Then use the sunrise/sunset table for the location nearest where you are going to carry on the activity to determine the legally authorized time to start and/or stop your activity. These tables are accurate in the vicinity specified with less than a two (2) minute error. These tables are Pacific Standard Time, so do not forget to add one hour for daylight savings time from March 14 - Nov. 7.

Please Note: A more complete listing of sunrise/sunset tables is available at ndow.org.

LEGAL HUNTING HOURS BY SPECIES

Migratory Birds	1/2 hour before sunrise to sunset
Small Game and Upland Game	Sunrise to sunset, EXCEPT for quail in Pahrump Valley of Nye County (8 a.m. to sunset)
Turkey - Spring	1/2 hour before sunrise to 4 p.m.
