NJDEP Fish & Wildlife receives federal assistance from the U.S. Fish and Wildlife Service and thus prohibits discrimination on the basis of race, color, national origin, disability, age and sex pursuant to Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, the Age Discrimination Act of 1975 and Title IX of the Educational Amendments of 1972. If you believe that you have been discriminated against in any program, activity or service, contact NJDEP Fish & Wildlife, MC501-03, P.O. Box 420, Trenton, NJ 08626-0420. The telephone number is 609-292-9410. You may also write to the Office of Civil Rights, Department of the Interior, 1849 C Street, NW Washington, DC 20240.
Another great fishing season is upon New Jersey. There are opportunities for both avid and beginner anglers! New Jersey may be small in size, but we have many choices when it comes to freshwater fishing. Whether you're fishing the fast-flowing streams of the state's northern highlands region, the slower rivers of central and southern New Jersey, or the many ponds, lakes, and reservoirs across the Garden State, this edition of the New Jersey Freshwater Fishing Digest has the information you need for a safe, legal and enjoyable day out on the water.

It is for good reason that anglers have long recognized New Jersey DEP Fish & Wildlife’s trout stocking program. After all, we’ve been producing and stocking trout for over 100 years. This year we’re excited to be celebrating the 40th year of trout production at our Pequest State Trout Hatchery. Through the hard work of the NJ Fish & Wildlife staff working at this facility, we provide anglers year-round trout fishing opportunities during our spring, fall and winter trout stocking programs. This facility produces over 600,000 trout of catchable size for these programs. We thank you for your continued support of these trout programs through your fishing license and trout stamp purchases. We truly could not do this without you.

One of the biggest questions anglers often ask themselves is, “where should I fish today?” Or maybe for you it’s, “which species do I want to fish for today?” If these are the questions you find yourself asking, we have the resources you need. Our newly updated website (NJFishandWildlife.com) quickly and easily gets you the information you need. The new content and site layout provides detailed information on freshwater fish in New Jersey and a “How to Get Started” page for new anglers. There’s also a direct link to our “New Jersey Freshwater Fishing Explorer” app where anglers can use their computer or mobile devices to find information and maps on stocking locations and great places to fish close to home. If “knowledge is power,” these resources will make you one of the strongest anglers out on the water.

Fishing has always been one of my favorite outdoor pursuits. I remember fishing for the first time as a child and the thrill I felt when that first fish tugged on the line and pulled under the bobber. It is remembering this experience that has kept me interested in being outdoors and introducing young people to the life-long satisfaction of fishing. I encourage all of you to bring someone new fishing with you this year. Kids under the age of 16 are not required to get a fishing license in New Jersey so you should always encourage kids to come fishing with you. Sharing your experiences can create life-long memories for you and those you bring.

There is a community that exists around freshwater fishing in New Jersey with great people coming together and enjoying the great outdoors. As you’re out fishing this year, remember that we have a shared responsibility to keep the waters and shores in our state clean. Adopt a “pack-it-in and pack-it-out” philosophy by taking all your trash and any loose fishing line with you when you’re done fishing for the day. If we all embrace this simple practice, our outdoor places will be much more welcoming when we venture out. Now let’s go fish!

Dave Golden is the Assistant Commissioner of New Jersey DEP Fish & Wildlife.

Get on The List!

Williamstown, MA | Birmingham, AL
Anglers and boaters purchase fishing equipment and motor boat fuels.

Manufacturers pay federal excise taxes on fishing equipment, electric motors, sonar, and boaters pay fuel taxes.

Revenue from these federal excise taxes is distributed to state fish and wildlife agencies.

State fish and wildlife agencies receive federal funds to implement programs and projects.

Better fishing and boating-associated recreation and aquatic education increase the public’s understanding of water resources and aquatic life.

When you purchase fishing equipment in New Jersey, excise tax dollars – paid by manufacturers of fishing equipment – come back to New Jersey to support freshwater fisheries! This is the federal **Sport Fish Restoration Program**.

Your license fees and federal Sport Fish Restoration dollars produce the following benefits:

- Management of public waters
- Production of the sport fish stocked in public waters
- Development and management of public fishing areas
- Creation of aquatic education programs
- Development and maintenance of boating-associated access facilities throughout the state

**Your Dollars Make a Difference!** Angler-funded partnership improves New Jersey fishing
Register. You make a difference! It’s free, easy and required.

Before heading out to catch your favorite marine fish this year, be sure to join the hundreds of thousands of anglers who have already registered with the New Jersey Saltwater Recreational Registry Program (NJSRP). Freshwater anglers fishing in tidal freshwater are also required to register with the NJSRP.

For more information on the NJ Saltwater Recreational Registry Program and to register, visit saltwaterregistry.nj.gov

After registering, become part of the fishery management process!

Submit fishing reports after each saltwater trip to the NJ Volunteer Angler Survey. Your fishing reports can help improve saltwater fishing opportunities in New Jersey.

Submit online reports at dep.nj.gov/njfw/fishing/marine/volunteer-angler-survey

New Jersey DEP Fish & Wildlife

Our Mission
To protect and manage the state’s fish and wildlife to maximize their long-term biological, recreational and economic value for all New Jerseyans.

Our Goals
- To maintain New Jersey’s rich variety of fish and wildlife species at stable, healthy levels and to protect and enhance the many habitats on which they depend.
- To educate New Jerseyans on the values and needs of our fish and wildlife and to foster a positive human/wildlife co-existence.
- To maximize the recreational and commercial use of New Jersey’s fish and wildlife for both present and future generations.
LEGENDARY FISHING AWAITS!

SALMON RIVER, PULASKI NEW YORK

It only takes one light tackle hook-up for you to understand why they are called Steelhead.

Anglers from around the world will tell you that these underwater lightning bolts do more than steal your bait. By the time they have had their way with you, they’ll have stolen your heart and soul. Whether heading up-stream for a fall feeding frenzy or dropping back to Lake Ontario in the spring, these 5-10 lb. “chromers” will give you the freshwater fight that brings you back for more.

Let this be your year to experience the legendary waters of the Salmon River -- long regarded as one of North America’s premier steelhead destinations!

Rainbow Trout with a Hook-A-Winner jaw tag. See page 43 for more information on this program.
As April approaches, many anglers are gearing up for another phenomenal trout season! You may not know that the stocked Rainbow Trout you seek are direct descendants of the original lineage that were brought in as eggs from West Virginia to kick off production at the Pequest Trout Hatchery.

Beginning in 1912, trout were first reared at the Hackettstown State Fish Hatchery. Over time, conditions for raising trout at Hackettstown became unfavorable, and the need for a new facility and water source became evident. Fortunately, years prior, the state geologist discovered a large, pristine aquifer in Warren County's Pequest Valley. This area would ultimately be purchased and protected as a Wildlife Management Area (WMA) and where NJ Fish & Wildlife's solitary trout production facility, the Pequest Trout Hatchery, would be built. At last count, the Pequest Wildlife Management Area currently exceeds 5,100 acres! Completed in 1982, the first trout were stocked in 1983, and the hatchery was in full production by 1986. This hatchery was designed for a yearly production of 600,000 trout. Now, 40 years later, it continues to provide anglers year-round trout fishing opportunities.
The Facility

The hatchery is comprised of a 48-tank intensive nursery building and egg room, set up with hatching trays and jars. The trout spend the earlier stages of their life in the nursery building, where they are fed a high protein diet 8-10 times a day. When outdoor pools become available, they are moved into the extensive outside raceway system, where they will spend the next year of their lives. They are fed four times a day until they reach a desired size. There are sixty-four concrete raceways, ten feet wide by one hundred feet long. Seven on-site artesian wells supply the hatchery with up to seven thousand gallons of water per minute. This groundwater supply has a constant temperature of 52°F (11°C) year-round and can maintain a continuous flow of water through the hatchery system, a critical factor in trout propagation. Flow from each of the operating wells is monitored closely and controlled remotely.

Biosecurity

Healthy fish have been our top priority since the hatchery first opened. NJ Fish & Wildlife initially secured over one million trout eggs of three different species from pathogen-free hatcheries. In addition to the previously mentioned Rainbow Trout eggs, Brook and Brown Trout eggs came from Massachusetts. Trout are hand-selected to serve as broodstock yearly to make sure a quality population is maintained and serves as an “in house” egg source. This is an important strategy to limit one external source of pathogens.

Precautions and procedures to protect against diseases are also in place. Dedicated employees operate and monitor the facility 24 hours, 7 days a week, year-round, using the latest fish culture technology and following disease-prevention guidelines. Stocking trucks are loaded outside the culture area to prevent any transfer of fish pathogens that may have been encountered while stocking the lakes and rivers throughout the state. Public viewing areas were built so that hatchery visitors can learn how trout are raised while limiting the risk of pathogen introduction. Actions are also taken to discourage avian predators from visiting the raceways. All these actions help reduce fish disease and limit mortality.

Despite all the precautions used at the Pequest Trout Hatchery, the bacterium Aeromonas salmonicida, which causes a disease called furunculosis, made its way into the hatchery in the fall of 2013. The most likely source was a predatory bird. The outbreak affected the Brook and Brown Trout at the hatchery. Despite efforts to treat the disease, those trout species displayed symptoms and experienced mortality, as they were highly susceptible to the bacterium and were removed from the facility in 2014. This was the most challenging time in the hatchery’s history. Fortunately, the hatchery’s Rainbow Trout strain proved to be resistant. They remain the only species raised at the facility at this time.

Rainbow Trout Production Cycle

Unlike wild Rainbow Trout which typically spawn in the spring, Pequest’s stock have been shifted to spawning in the fall. Beginning in late August through early September, broodstock Rainbow Trout are sorted by sex. Female trout produce eggs that are manually stripped and fertilized with milk (sperm) from male trout. This process occurs weekly through October or until our egg quota is met. Fertilized eggs are water hardened and disinfected to prevent fungus and bacteria before being put in trays and jars. Water is run continuously through the trays and jars to keep the eggs oxygenated. Approximately 1.5 million trout eggs are taken from about 600 females annually.

Fertilized eggs spend 30–32 days in incubator trays where they will stay until they begin to hatch in about 30–32 days. Despite all the precautions used at the Pequest Trout Hatchery, the bacterium Aeromonas salmonicida, which causes a disease called furunculosis, made its way into the hatchery in the fall of 2013. The most likely source was a predatory bird. The outbreak affected the Brook and Brown Trout at the hatchery. Despite efforts to treat the disease, those trout species displayed symptoms and experienced mortality, as they were highly susceptible to the bacterium and were removed from the facility in 2014. This was the most challenging time in the hatchery’s history. Fortunately, the hatchery’s Rainbow Trout strain proved to be resistant. They remain the only species raised at the facility at this time.

Spring Stocking

The spring program is by far the largest and most popular. The traditional trout fishery in New Jersey revolves around the eagerly anticipated season opener in early April. Approximately 570,000 catchable-size Rainbow Trout (averaging 10.5-inches) are released over a ten-week period in about 170 lakes and streams statewide, with three weeks of stocking preceding Opening Day and seven weeks following. NJFW also mixes in about 7,000 large broodstock, with some fish weighing up to 7 lbs., during this stocking period to get anglers even more exited for trout season!
Distribution of over 570,000 trout to nearly 1,000 stocking points in over 170 waterbodies requires substantial internal agency communication, cooperation, and coordination. NJ Fish & Wildlife maintains eight stocking trucks, each capable of transporting a maximum load of 1,900 pounds of fish (approximately 3,800 catchable trout), with several smaller trucks used to deliver trout into smaller, harder to reach locations. Hatchery staff load these trucks daily, assisted by Bureau of Land Management staff during the 10-week spring stocking period.

**Fall Stocking**

Initiated in 1987, fall trout stocking compliments the spring program and expands trout fishing opportunities statewide. Trout fishing tapers off during the summer as conditions are less favorable for trout (higher water temperatures and low stream flows). This fall program stocks 21,000 two-year-old Rainbow Trout averaging 14–15 inches, into 36 streams, lakes, and ponds during mid-October. An additional 1,000 larger three-year-old broodstock are also added into the loads. Fall trout fishing has become increasingly popular, particularly since 2006, when the program shifted to stocking only larger two-year-old trout, as opposed to the much smaller one-year-old trout which are substantially smaller than those offered in the spring. Anglers enjoy the additional fish provided and the opportunity to fish the waters of New Jersey during one of the most beautiful times of the year. The big fish, cool water, spectacular scenery, and great weather combine to make the fall season what many consider New Jersey’s premium trout fishing season.

**Winter Stocking**

The winter trout program was initiated in 2000 to add variety and offers anglers the opportunity and incentive to brave the winter elements in pursuit of trout under ice fishing opportunities, where allowed. Currently, the hatchery raises approximately 4,500 catchable-size Rainbow Trout, measuring up to 16 inches. They are stocked in 18 lakes and ponds for two days in November, just before Thanksgiving.

**40 Years and Counting…**

The next time you wet your line, take a moment to think of all that goes into raising over 600,000 trout to catchable size and beyond, know that the dedicated staff at NJ Fish & Wildlife’s Pequest Trout Hatchery work tirelessly to ensure that their product is second to none! Staff take tremendous pride in providing you with quality trout fishing opportunities. We also want to thank those who contribute to this program by purchasing a New Jersey fishing license and trout stamp annually.

Support Wildlife Habitat

WHAT CAN YOU DO?

Become a Wildlife Habitat Supporter!

Did you know that NJDEP Fish & Wildlife manages more than 360,000 acres in 122 wildlife management areas throughout the state?

These spaces protect and conserve fish and wildlife habitat while providing opportunities for outdoor recreation such as fishing, hunting, birding, wildlife viewing, hiking and more! You can help to ensure the conservation of these natural treasures for the enjoyment of generations to come by becoming a Wildlife Habitat Supporter and making a donation. Donations will be used to:

- Manage and restore fish and wildlife habitat.
- Enforce fish and wildlife regulations.
- Restore and protect endangered and nongame species.
- Fund fish and wildlife educational programs and more.
- Improve public access to recreational facilities on WMAs.

Visit dep.nj.gov/njfw/conservation/wildlife-habitat-supporter-program

Stripped Bass Circle Hook Requirement

To reduce Striped Bass release mortality, non-offset (inline) circle hooks must be used when fishing for Striped Bass with bait in all waters. Bait is defined as any marine or aquatic organism live or dead, whole or parts thereof. This restriction shall not apply to an artificial lure with bait attached. A circle hook is a non-offset hook where the point is pointed perpendicularly back towards the shank. Non-offset means that the point and barb are in the same plane as the shank. Striped Bass caught using an unapproved take method must be immediately returned to the water.

Supporters who donate $25 or more receive a beautiful, first-edition collectible car decal.

License Information

2023 REGULATIONS

Regulations in red are new this year.

Licenses

- A valid New Jersey fishing license is required for residents at least 16 years and less than 70 years of age (plus all non-residents 16 years and older) to fish the fresh waters of New Jersey, including privately owned waters. See below for the money-saving Buddy Fishing License.
- For fishing-related license and permit fees, see page 1. See below for Purchasing a License.
- Resident anglers age 70 and over do not require a fishing license. A driver license or other acceptable proof of age containing date of birth and physical description will serve as the actual fishing license. Non-residents 70 and over must purchase a license.
- License must be visibly displayed on outer clothing.
- License and trout stamp are both valid from date of purchase through Dec. 31.
- A person must have an established domicile (principal residence) in New Jersey for at least the previous six months to obtain a resident fishing license.
- Farmers and immediate family members who live on the farm do not need a license to fish on their own farm, but must obey all fishing regulations.
- Anyone convicted of a second fish or wildlife violation in this or another state within a period of five years will have his or her New Jersey sport-lower or trout stamps originally purchased online, a reprint can be made free of charge on plain paper. Durable stock duplicates can be ordered online for $2 per item.
- Lost License or Stamp

Replacement — Lost License or Stamp

Replace a license, permit or stamp at any license agent or online at NJ Fish & Wildlife’s internet license sales site, https://nj.aspirafocus.com/internetsales or at license agents such as sporting goods or bait and tackle stores. Call first to confirm agent’s system is active. Visit NJFishandWildlife.com for details, or call 609-292-2965.

Special Licenses

Servicemen and Servicewomen

A person on active duty in the United States armed services, regardless of their current residency, may buy a New Jersey resident fishing license. Active duty military ID must be shown to the license agent as proof of entitlement.

New Jersey National Guard

Only New Jersey National Guard personnel in good standing are entitled to free sporting licenses, permits and stamps. These privileges are not available using NJ Fish & Wildlife’s website. However, the NJ Dept. of Military and Veterans Affairs can issue fishing licenses through their DMAVA website at https://nj.aspirafocus.com/internetsales or at license agent or online at NJ Fish & Wildlife’s internet sales site, https://nj.aspirafocus.com/internetsales also linked through our regular license sales site, https://njFishandWildlife.com. For fishing licenses or trout stamps originally purchased online, a reprint can be made free of charge on plain paper. Durable stock duplicates can be ordered online for $2 per item.

Veterans Licenses, Stamps and Permits

Free hunting and fishing licenses, stamps and permits are available for resident veterans with a service-connected disability.

For the purposes of this program, legislation defines disabled veterans as “…any resident of New Jersey who has been honorably discharged or released under honorable circumstances from active service from any branch of the Armed Forces of the United States and who has been declared by the United States Department of Veteran Affairs, or its successor, to have a service-connected disability of any degree…”

Newly applying disabled veterans can obtain their hunting and fishing licenses and stamps by mailing the application and all required documentation to: NJDEP Fish & Wildlife, Attn: Disabled Veteran Licensing, MC 501-03, PO Box 420 Trenton, NJ 08625-0420.

NJ Fish & Wildlife offices no longer accept Disabled Veteran Certifications in person. For information and updates, go to dep.nj.gov/njfw/licenses-and-permits/disabled-veteran-license-information.

All licenses, stamps and permits for which the veteran is eligible will be free of charge. This does not give preferential treatment in any lottery. For questions call 609-292-2965.

Disabled Veteran Applicants:

1. Documentation of current benefits for a service-connected disability and proof of honorable

FISH with a BUDDY and Save Almost 50% Off Your Fishing License!

Introduce a friend or family member to fishing and you BOTH save nearly 50% on your fishing licenses!

- The Fishing Buddy License offers reduced license prices to both a current and a new angler, or two new anglers.
- Buddy fishing licenses are available online or in person at any license agent.

Pass on the tradition and we will pass on the Savings!

For more information, visit dep.nj.gov/njfw/fishing/freshwater/fishing-buddy-licenses. Persons who already receive special discount pricing or free licenses, senior license buyers (65 and over), disabled vets, National Guard personnel are not eligible for a "Buddy" fishing license.

discharge (copy of your DD-214, VA card or monthly check stub) must be presented to obtain a disabled veteran certification.

2. Applicant must provide a hunter education course certificate applicable to the license for which they are applying or a previously issued resident archery or firearm license or rifle permit. Resident licenses from other states are accepted if the license indicates the sporting arm for which it was valid. Non-resident licenses from other states are not acceptable.

3. To obtain the free disabled veteran deer/turkey permits one must first have a free disabled veteran hunting license.

For the Blind
Residents with total blindness may obtain a free license. Call 609-292-2965 for an application.

Summary of General Fishing Regulations

The season, size and creel limits for freshwater species apply to all waters of the state, including tidal waters.

- Fish may be taken only in the manner known as angling with handline or with rod and line, or as otherwise allowed by law.
- When fishing from the shoreline, no more than three fishing rods, handleins or combination thereof may be used (except on the Delaware River. There is no rod limit when fishing from a boat except for the Delaware River.) For the Delaware River the three rod limit applies both to boat and shoreline anglers (see page 27).
- Only one daily creel of any fish species may be in possession. Additional fish may be caught once the creel is reached if immediately returned to the water unharmed.
- Separate stringers or buckets must be used for each angler’s catch.
- Boats may contain only the combined daily creel limit for each legal angler on board.
- A fishing license does not authorize trespassing on private property. Permission must first be obtained from the landowner.

It Is Unlawful To:

- Fish within 100 feet (or as posted) of any fish ladder entrance or exit from March 1 through June 30.
- Spear fish in fresh waters except as specified for Delaware River, page 27.
- Possess a fishing device with more than nine hooks in total, or more than three treble hooks, except for the Delaware River; see page 27.
- Use set lines.
- Use cast nets in freshwater lakes or trout stocked waters. See Baitfish Regulations, page 29 for other exclusions.
- Foul hook or snag any species of fish. This does not apply to fish taken through the ice.

Bow and Arrow Fishing

Carp (including bighead, common, grass), eels, flathead catfish, American shad (Delaware River only), gizzard shad, snakeheads and suckers or hybrids of these species—may be taken at any time by use of a bow and arrow (with a line attached to the arrow) when in possession of a valid fishing license. Crossbows may be used when bowfishing except for Greenwood Lake. Crossbows must have a stock length of at least 25 inches, a minimum draw weight of 75 pounds and a working safety. Crossbows must be uncoked during transport or when not actively fishing. They may not be permanently mounted. NOTE: Some municipalities have banned the discharge of bow and arrow, tethered arrow or not. As such, anglers are strongly urged to check with the waterbody owner and/or municipality prior to engaging in bowfishing. See regulations for the Delaware River and Greenwood Lake, pages 26–28.

Emergency Closures

It is illegal to fish or attempt to catch or kill fish by any manner or means in any waters for which the Assistant Commissioner of NJ Fish & Wildlife, upon approval by the Fish and Game Council, issues an emergency closure notice. Such notification is effective and/or rescinded immediately upon public notification. Emergency closures shall be based upon imminent threat to the well-being of the fishery resources, and/or its users, and may include any exceptions to the total ban of fishing that the Assistant Commissioner deems practical.

Ice Fishing

No more than five devices per person may be used when fishing through the ice. Legal devices include:

1. Ice supported tip-ups or lines with one single pointed hook attached, or one butt of three hooks that measure not more than ½-inch from point to shank.
2. An artificial jigging lure with not more than one butt of three hooks that measure not more than ½-inch from point to point.
3. An artificial jigging lure with not more than three single hooks measuring not more than ½-inch from point to shank.
4. An artificial jigging lure with a combination of the hook limitations described in 2 and 3 above.

Natural bait may be used on the hooks of the artificial jigging lures. All devices that are not hand-held must bear the name and address of the user and cannot be left unattended.

See separate regulations for trout-stocked waters and Greenwood Lake.

Water Supply Reservoirs Open To Fishing By Permit Only

Permits must be obtained from the specific reservoir owner listed below. A valid fishing license is also required.

Potentially Dangerous Fish

The possession or release of live, potentially dangerous fish is prohibited. These species include Asian swamp eel, bighead, grass (diploid) and silver carp, blue and flathead catfish, round goby, brook stickleback, green sunfish, oriental weatherfish, snakehead and warmouth. All black bass except for largemouth and smallmouth bass are considered potentially dangerous. Anglers MUST destroy these species if encountered while fishing and should submit specimen(s) or photos to a NJ Fish & Wildlife Bureau of Freshwater Fisheries biologist for verification. To reach a regional biologist, call 908-236-2118 (north), 609-223-6076 (central) or 856-629-4950 (south). These non-native species are likely to cause environmental harm to the state’s fisheries resources by outcompeting preferred game fish species. Common carp are an invasive species but are NOT classified as a potentially dangerous fish and do not have to be destroyed.

Sale of Fish

It is illegal to sell any freshwater fish species except under commercial permits as prescribed in the Fish Code. Artificially-propagated trout, if properly tagged, may be sold for food purposes.

Stocking Fish

A permit is required to stock fish or fish eggs into any waters of the state, public or private, at any time. Applications are available online at dep.nj.gov/njfw/fishing/freshwater/regulations-and-permits or by contacting the Bureau of Freshwater Fisheries 908-236-2118. It is ILLLEGAL to stock carp or koi into any waters. No trout may be used as bait or stocked within the PEQUEST RIVER DRAINAGE except by the Pequest Trout Hatchery.

Tagging Fish

No person may tag or mark and then release a fish without first obtaining a fish stocking permit or by special permit issued by NJ Fish & Wildlife. Contact the Bureau of Freshwater Fisheries 908-236-2118 for application information.

Waste of Fish

Fish of any species which are purposely killed become part of the angler’s daily limit and must be removed from the waters from which they were taken, then either used or otherwise disposed of properly.

fishcap.net
2023 General Trout Fishing Information

- Opening day of trout season: Saturday, April 8, 2023 at 8 a.m.
- To fish for trout or salmon, a valid New Jersey fishing license and trout stamp are both required for residents at least 16 years and less than 70 years of age plus all non-residents 16 years and older.
- All Brook Trout caught within the “Brook Trout Conservation Zone” must be immediately released unharmed. The zone consists of all waters within the northwest region of the state, where most remaining wild Brook Trout populations occur. The Conservation Zone includes all waters west of I-287 and north of Rt. 202, extending to, but not including the Delaware River. See map on page 21.
- Waters stocked with trout in the spring are listed below (those with no in-season closures) AND on page 18 (those with in-season closures). Note: Special regulations may apply on some of these waters, or sections thereof.
- During the three weeks prior to opening day, all ponds, lakes or sections of streams listed are stocked with trout, except Trophy Trout Lakes. These waters are closed to fishing for all species from March 20 to April 8 at 8 a.m. Exceptions: Lake Century B, Great Mountain Lake, Lake Shenandoah, Lawrence Brook (section from Davidson's Mill Rd. to Farrington Lake dam), Pospertown Lake and Swartswood Lake are open year round to fishing. However, all trout caught during this period (above) must be released immediately. Seasonal and Year-round Trout Conservation Areas and designated Holdover Trout Lakes (see pages 19–21) are also open to fishing but are catch-and-release only for trout. Fishing is not permitted on Seasonal Trout Conservation Areas from 12:01 a.m. to 8 a.m. on April 8, 2023. Round Valley and Merrill Creek Reservoirs (Trophy Trout Lakes) are open to year-round fishing; trout may be harvested within the regulations as shown on page 21.
- After opening day, stocked trout waters are open to fishing, including the days they are stocked, unless specifically listed with in-season closures (page 18). In-season closures also apply to designated Seasonal Trout Conservation Areas (page 19).
- Only one daily creel limit of trout may be in possession. Once the creel limit is reached, an angler may continue to fish provided any additional trout caught are immediately returned to the water unharmed.
- When fishing from the shoreline, no more than three fishing rods, hand lines or combination thereof may be used. Separate stringers or buckets must be used for each angler’s catch.
- Containers in boats may hold only the combined daily creel limit for each legal angler on board.
- NJ Fish & Wildlife reserves the right to suspend stocking when emergency conditions prevail.

Spring Trout Stocked Waters With No In-Season Fishing Closures

After opening day, these waters may be fished on the day they are stocked.

Note: All waters listed are stocked with trout pre-season (three-week period preceding opening day) except Round Valley and Merrill Creek Reservoirs. The number in parentheses shows the anticipated number of in-season stockings (April 10 through May 26). A zero indicates the water will be stocked only during pre-season. For weekly updates on stocking details, call the Trout Hotline’s recorded message at a NEW number 609-322-9524. (Spring stocking: April–May; Fall stocking: October; Winter stocking: November.) Or visit NJFishandWildlife.com where you will also find directions to public-access portions of trout-stocked waters.

Regulations in red are new this year.

* Due to serious declines in American Shad numbers, the taking of American Shad, except for the Delaware River, is prohibited.

** Non-offset circle hooks required when fishing with bait. Pennsylvania allows anglers to harvest a daily limit of two striped bass measuring 21 to less than 24 inches for a two month period from April 1 through May 31 from the Calhoun St. Bridge in Trenton downstream to the Pennsylvania state line. New Jersey still has a closed season. Anglers fishing the Delaware River from the New Jersey shoreline, or returning to New Jersey by boat and/or car in April and May must abide by New Jersey’s striped bass regulations. Possession of Striped Bass in New Jersey is illegal during this time period. Anglers should be aware that there are differing size limits and seasons for Striped Bass for each of the three states bordering the Delaware River. Anglers must obey the regulations for the particular state where they land (catch) Striped Bass.
Fishing The Delaware River

Regulation Notices
The Delaware River is a boundary water shared by Pennsylvania and New Jersey with each state’s border generally following the centerline of the river. Although the majority of the fishing regulations enacted by both states are identical, there are some distinct differences. Anglers fishing this river must be aware of each state’s fishing regulations.

Regardless of an angler’s residency or point of boat launching, all are required to comply with the regulations of the state in which they are fishing. An angler fishing—or in possession of fish—between the centerline of the river and the New Jersey shoreline must comply with the New Jersey fishing regulations. An angler fishing—or in possession of fish—between the centerline of the river and the Pennsylvania shoreline must comply with the Pennsylvania fishing regulations.

The reciprocal agreement regarding fishing licenses remains in effect and anglers may continue to fish from shoreline to shoreline in the Delaware River between Pennsylvania and New Jersey using either state’s fishing license. Information on each state’s fishing regulations can be found at www.fishandboat.com and NJFishandWildlife.com. It is incumbent upon anglers to determine in which state they are currently fishing, taking into account that in areas where the river splits, such as around islands, the boundary is clearly and legally defined to one side of the island or another.

- New Jersey and Pennsylvania fishing licenses are both recognized when fishing the Delaware River from a boat or either shoreline. This applies to the main stem of the river only.

- Anglers may launch a boat from either shore and on return, may have in possession any fish which may be legally taken according to the regulations of the state where the landing is made.
- No more than three rods, each with one line, or two hand lines—or one of each—may be used. No more than three single hooks or three treble hooks per line.
- To reduce striped bass release mortality, non-offset (inline) circle hooks must be used when fishing for striped bass with bait in all waters.
- The use of crayfish, clams, mussels, reptiles or amphibians as bait is prohibited within the Delaware Water Gap Natural Recreation Area, unless it is a commercially produced, preserved and packaged product.
- Spears (not mechanically propelled) and bow and arrows may be used to take carp, catfish, shad and suckers except within 825 feet of an eel weir. A valid fishing license is required.
- Baitfish may be taken and possessed for personal use and are not to be bartered or sold. Alewife or Blueback Herring may not be taken at any time.
- A Delaware fishing license is required for anglers aged 16 and over fishing the Delaware Bay and Delaware River between the upstream tip of Artificial Island and the Delaware-Pennsylvania state line. In that section of the river, the Delaware state boundary extends to the New Jersey shoreline. However, when fishing from shore in New Jersey along that section of the river, a Delaware fishing license is not required. Delaware fishing license information can be found at https://dnrec.alpha.delaware.gov.
- Delaware River Basin Commission recreation maps are available for $10.70. For online ordering information visit nj.gov/drbc/basin/recreation.
- Information for the Delaware Water Gap National Recreation Area is available online at www.nps.gov/dewa.

All Other Species                        | Open year round       | No minimum     | No limit    |

- New York and New Jersey fishing licenses are both recognized anywhere on the lake or along the shoreline.
- Fishing is permitted 24 hours a day.
- In compliance with New York regulations, only certified virus-free baitfish may be transported to, or used on, the portion of Greenwood Lake owned by the State of New York. Anglers are urged to use only certified virus-free baitfish when fishing any portion of Greenwood Lake.
- Bow and arrow fishing for all carp, sucker, herring, catfish and eel is permitted. Crossbows are NOT allowed at Greenwood Lake. A valid fishing license is required.
- No more than five tip-ups and two hand-held devices may be used when ice fishing. All devices that are not hand held must be plainly marked with the name and address of the angler.

2023 New Jersey Musky School

You don’t want to miss the annual Musky School offered by Muskies Inc., now on Greenwood Lake!

Learn how to catch these elusive fish. This course offers informative tips and techniques to help any musky angler—beginner to experienced angler—catch more muskies.

Learn from our seasoned veteran anglers. In the morning, classroom-style sessions will orient anglers on locations to fish, forage base, lure presentations, fishing tactics and more. Later in the day, participants will be on the water in a fully-equipped boat to pursue muskies with a personal instructor. This 6-hour course includes a shore lunch. This is a catch and release event. Muskies Inc. is a non-profit organization. This is a fundraising event. All proceeds benefit the New Jersey musky fishery.

May 20, 2023 on Greenwood Lake

Fee: $385 includes one-year membership to Muskies Inc. Contact Ralph C. via e-mail at muskyschool@gmail.com. For more information, visit www.MuskiesInc.org and www.mi22.com. Like us on Facebook at Muskies Inc Chapter 22-New Jersey.
Baitfish Regulations

**BAITFISH SPECIES**

| Baitfish species: American Eel, Banded Killifish, Creek Chub, Fallfish, Fathead Minnow, Gizzard Shad, Golden Shiner, Margined Madtom, Mummichog, and Tadpole Madtom. For Herring, Alewife and Blueback—see below. |

**GEAR DESCRIPTION**

- **Seine**
  - Not over 50 feet long in ponds and lakes over 100 acres; in all other waters not over 30 feet in length. **Exception:** In trout-stocked waters and special regulation trout areas a seine may not be more than 10 feet in length and 4 feet in depth.

- **Minnow Trap**
  - Not larger than 24 inches in length with a funnel mouth no greater than 2 inches in diameter.

- **Umbrella Net**
  - No greater than 3.5 feet square.

- **Dip Net**
  - Not more than 24 inches in diameter; may be used only for alewife or blueback herring.

- **Cast Net**
  - No greater than 8 feet in diameter; may be used only in streams that are not trout-stocked or special regulation trout areas (may not be used in lakes).

- **Hook and Line**
  - Maximum of nine single hooks or three hooks with three burrs per contrivance on all waters except the Delaware River where only three single hooks are permitted.

**Turtle and Frog Regulations**

**SPECIES**

- **Snapping Turtle**
  - April 1–May 14
  - July 1–October 31
  - Statewide
  - 12 inches
  - 1 per day

- **Bull Frog and Green Frog**
  - January 1–March 31
  - July 1–December 31
  - Statewide
  - No minimum
  - 15 per day, combined

**MEANS OF TAKE**

- Snapping turtles may only be taken in fresh waters of the state. See page 30 for established fishing license boundary lines that designate between fresh and marine waters. Any person with a valid fishing license or those entitled to fish without a license may take snapping turtles, bull frogs, and green frogs by means of spears, traps, hook and line, dip nets (not more than 24 inches in diameter), or by hand. They may NOT be sold unless taken under a Commercial Harvest Permit. Bull frogs, and green frogs may be taken in numbers greater than the daily limit under a Commercial Harvest Permit issued by NJ Fish & Wildlife at its discretion. The commercial harvest of snapping turtles is closed to new harvesters. Existing harvesters may contact NJFWFish@dep.nj.gov for application information.
Fishing License Boundary Lines

2023 REGULATIONS

A fishing license is required to fish the fresh waters of the state. Locations listed below mark the change from salt water (license not required) to fresh water. A fishing license is required at—and upstream of—these locations. Snapping turtles may only be taken from fresh waters of the state.

ATLANTIC COUNTY
Absecon Creek—Dam at Lower Atlantic City Reservoir
Great Egg Harbor River—Power lines at confluence of Gravelly Run
Middle River—None—all saline water
Mullica River—Line between Second Ave., Sweetwater, and ramp at Crowleys Landing
Nacote Creek—Port Republic dam
Patcong Creek—Bargaintown Lake dam
South River—Power lines immediately below Rt. 50
Tuckahoe River—First northerly tributary downstream of Rt. 49 bridge (McNeals Branch)

BERGEN COUNTY
Hackensack River—Cedar Lane Bridge between Hackensack and Teaneck
Hudson River—None—all saline water
Passaic River—Required whole length

BURLINGTON COUNTY
Assiscunk Creek—Required whole length
Bass River State—Rt. 68 bridge
Batsbo River—Required whole length
Blacks Creek—Required whole length
Crosswicks Creek—Required whole length
Delaware River—Required whole length
Mullica River—Line between Seventh Ave., Sweetwater, and ramp at Crowleys Landing
Pennsauken Creek—Required whole length
Pompeston Creek—Required whole length
Rancocas Creek—Required whole length
Swedes Run—Required whole length
Wading River—Charcoal Landing, Chips Polly Campground

CAMDEN COUNTY
License required on Delaware River and all other waters

CAPE MAY COUNTY
Bidwell Creek—None—all saline water
Cedar Swamp Creek—None—all saline water
Dennis Creek—None—all saline water
East Creek—100 ft. below East Creek Lake dam, Eldora Tuckahoe River—First northerly tributary downstream of lower Rt. 49 bridge (McNeals Br.)
West Creek—100 feet below West Creek Lake dam (Pickle Factory Pond)

CUMBERLAND COUNTY
Andrews Creek—None—all saline water
Back Creek—None—all saline water
Cedar Creek—100 ft. downstream of Cedar Lake dam
Cohansey River—Rt. 49 bridge at Bridgeton
Dividing Creek—Rt. 555 bridge
Fishing Creek—None—all saline water
Fortescue Cr./Branch of Oranokon Cr.—None—all saline water
Manusumkin Creek—Required whole length
Maurice River—Mouth of Manususkin Creek near Port Elizabeth
Manenatic Creek—Required whole length
Mill Creek—Tributary of Cohansey—Rt. 553 bridge, Fairton
Muske Creek—S. side of bridge on Weathersby Rd.
Nantuxent Creek (Pages Run)—Rt. 553 north of Frames Corner
Oranokon Creek—Whitecar Mill, North of Beaver dam
Oyster Creek—None—all saline water
Riggins Ditch—Rt. 47 bridge
Sow and Pigs Branch Nantuxent—None—all saline water
Stow Creek—Buckhorn Rd. bridge, Jericho
Straight Creek—None—all saline water
West Creek—100 ft. below West Creek Lake dam (Pickle Factory Pond)

ESSEX COUNTY
Passaic River—Erie Railroad bridge between Newark (at Verona Ave.) and Kearny
Peddie Ditch—None—all saline water

GLOUCESTER COUNTY
Big Timber Creek—Required whole length
Delaware River—Commodore Barry bridge at Bridgeport
Manus Creek—Required whole length
Oldmans Creek—Rt. 295 bridge
Raccoon Creek—Required whole length
Woodbury Creek—Required whole length

HUDSON COUNTY
Hackensack River—None—all saline water
Hudson River—None—all saline water
Passaic River—Railroad bridge between Newark (at Verona Ave.) and Kearny

HUNTERDON COUNTY
License required on Delaware River and all other waters

MERcer COUNTY
License required on Delaware River and all other waters

MIDDLESEX COUNTY
Cheesequake Creek—Dam at Cheesequake Lake, Cheesequake State Park
Lawrence Brook—N.J. Turnpike bridge, East Brunswick
Raritan River—Landing Lane bridge, New Brunswick
South River—Rt. 527 bridge (New Brunswick Old Bridge Tpk.)
Woodbridge River—N.J. Turnpike bridge

MONMOUTH COUNTY
Black Creek—Spillway at Ocean Rd.
Branchport Creek—Mouth of Turtle Mill Brook
Deal Lake—Top of dam
Hockhockson (Pine) Brook—Garden State Parkway northbound bridge
Little Silver Creek—Little Silver Creek Brook
Manasquan River—Bennetts bridge, Manasquan Wildlife Management Area
Matawan Creek—Lefferts Lake dam
Oceanport Creek—Mouth of Husky Brook
Parkers Creek—Mouth of Parkers Creek Brook
Shark River—Remsen Mills Rd.
Swimming River—Swimming River Rd. bridge
Wreck Pond Creek—Rt. 71 bridge

MORRIS COUNTY
License required on all waters

OCEAN COUNTY
Beaver Dam Creek—Rt. 88 bridge
Cedar Creek—Rt. 9 bridge
Cedar Run—Rt. 9 bridge
Dinner Point Creek—None—all saline water
Double Creek—None—all saline water
Forked River—All branches Rt. 9
Gunning River—None—all saline water
Jakes Branch—Above Atlantic City Blvd.
Jeffreys Creek—Ocean Gate Rd. to Ocean Gate
Kettle Creek—Rt. 549 bridge
Lake of the Lilies—Entire lake
Long Swamp Creek—Washington St. bridge, Toms River
Manahawkin Creek—Dams for Manahawkin WMA impoundments bayside
Metedecook River—Rt. 70 bridge, Laurelton
Mill Creek—Mouth of Creek at lagoons in Beach Haven West
Mill Creek—Pine Beach–Ocean Gate Road
Oyster Creek—Rt. 9 bridge
Parkers Run—None—all saline water
Potters Creek—None—all saline water
Stouts Creek—None—all saline water
Stouts Creek S. Br.—Bayside East Parkway
Toms River—Garden State Parkway, northbound bridge
Tuckerton Creek—Dam at Rt. 9 bridge
Waretown Creek—Rt. 9 bridge
West Creek—Rt. 9 bridge

PASSAIC COUNTY
License required on all waters

SALEM COUNTY
Alloway Creek—Rt. 540 bridge at Alloway
Black Ditch—None—all saline water
Delaware River—None—all saline water
Fishing Creek—None—all saline water
Hope Creek—None—all saline water
Mad Horse Creek—None—all saline water
Mill Creek—None—all saline water
Oldmans Creek—Rt. 295 southbound bridge
Salem River—Dupont dam near Cedar Crest Manor
Salem Canal—Dam at Deepwater
Stow Creek—Buckhorn Rd. bridge, Jericho
Straight Ditch—None—all saline water

SOMERSET COUNTY
License required on all waters

SUSSEX COUNTY
License required on Delaware River and all other waters

UNION COUNTY
Elizabeth River—West Grand St., Elizabeth
Great Ditch—None—all saline water
Morses Creek—Old Morses Mill Rd.
Oyster Creek—None—all saline water
Peddie Ditch—None—all saline water
Piles Creek—None—all saline water
Rahway River—Lawrence St. (Rt. 514), Rahway

WARREN COUNTY
License required on Delaware River and all other waters

Important Footnotes

1. Absence of a river, creek, brook or other waterway from this list does not make it exempt from requiring a license to fish the fresh waters.

NJFishandWildlife.com
Field Trials
Permits for use of wildlife management areas for running of field trials may be granted by NJ Fish & Wildlife. Apply for a permit by calling 609-259-2132.

Dog Training and Exercising
Dogs may be exercised or trained on any WMA from Sept. 1 to April 30. All dogs must be properly licensed. Select WMAs with designated dog training areas also permit dogs to be exercised or trained from May 1 to Aug. 31. For more information, see the New Jersey Hunting and Trapping Digest or call 609-984-0547.

Outboard Motors
Only electric motors are allowed on freshwater lakes and ponds managed by NJ Fish & Wildlife with the exception of Union Lake, where outboard motors not exceeding 10 hp. may be used. On Prospectown Lake, only manually operated boats and canoes are allowed.

Horseback Riding
Horseback riding is allowed on designated WMAs only by permit from NJ Fish & Wildlife. Apply online at https://nj.aspirafocus.com/internetsales. Horseback riding permits should be displayed on outer clothing while riding, not covered by a pack or other equipment. For more information on horseback riding permits, call 609-259-2132.

Fishing Tournament
Any club or organization that would like to use a New Jersey Wildlife Management Area for fishing tournaments must apply for and secure a permit from NJ Fish & Wildlife. No fee is required. Applications will be accepted in January at NJ Fish & Wildlife’s Central Region Office, One Eldridge Rd., Robbinsville, NJ 08691 at 609-223-6076.

Boat Ramp Maintenance Permit
Any vehicle used to transport or launch a vessel or water conveyance on the following WMAs must have affixed to the lower corner of the driver’s side rear window a boat ramp maintenance permit, or a photocopy of a valid hunting, fishing or trapping license. Be sure your Conservation ID number is clearly displayed; all other personal information may be blacked out for reasons of privacy.

The boat ramp maintenance permit fee is $15, available from a license agent or at NJ Fish & Wildlife’s Internet sales site, https://nj.aspirafocus.com/internetsales.

Residents 70 years and older are not required to obtain a boat ramp maintenance permit and need no license, but must affix to their window proof of age, such as a former license displaying your date of birth.

WMAs requiring boat ramp maintenance permits:
1. Round Valley 5. Mad Horse Creek
2. Assunpink 6. Union Lake
3. Dennis Creek 7. Menantico Ponds
4. Tuckahoe 8. Prospectown Lake

Accessible Fishing Sites
For people with disabilities, visit: dep.nj.gov/njfw/wp-content/uploads/njfw/wcaccesslist.pdf
An Accessible Fishing Sites list is available to assist anglers whose mobility is impaired.
All sites are wheelchair-accessible except for the Musconetcong River in Morris County, where vehicle access is to the shoreline.

State Police Marine Law Enforcement Stations
| Bivalve | 856-785-1330 |
| North Wildwood | 609-522-0393 |
| Atlantic City | 609-441-3586 |
| Burlington | 609-387-1221 |
| Ocean | 609-296-5807 |
| Point Pleasant | 732-899-5050 |
| Monmouth Station | 732-842-5171 |
| Lake Hopatcong | 973-663-3400 |
| Newark Bay | 973-578-8173 |

NJ’s Freshwater Fishing Explorer App
New Jersey DEP Fish & Wildlife’s new Freshwater Fishing Explorer App combines the Great Fishing Close to Home App and the new Trout Water Map all in one place!

The Trout Stocked Waters tab provides the stocking dates and number of trout stocked for all trout stocked waters in our spring trout stocking program. Clicking on a water feature within the map will pull up the stocking schedule, the number of fish to be stocked and closures.

The Great Fishing Close to Home tab allows users to explore the great diversity of fishing opportunities New Jersey has to offer. This application includes over 290 publicly accessible lakes, ponds and reservoirs picked by NJ Fish & Wildlife staff as good places to fish in the state.

Find it at www.njfishandwildlife.com/freshwaterfishing/
Report Abuse of our Outdoor Heritage!

1-855-OGT-TIPS

24 Hours a Day, Seven Days a Week

Call OGT to report:
- Negligent use of firearms
- Over the limits for game and fish
- Commercial exploitation of fish and wildlife
- Pollution of habitat, dumping on state land
- Destruction of signs and state property
- Illegal killing, taking or possession of any wildlife

It's Free. It's Confidential. You May Be Eligible for a Reward.

Funded by the New Jersey State Federation of Sportsmen’s Clubs. Designed to encourage sportsmen to report poaching and wildlife crimes.

Freshwater Fisheries Forum and Trout Meeting

Fisheries Forum — Virtual
February 25, 2023; 10 a.m.

Trout Meeting — Virtual
March 4, 2023; 10 a.m.

Come and share your views and recommendations for the future of freshwater fisheries in New Jersey and learn about current research, management and fish culture activities!

Please look for additional in-person public meetings at a later date.

Presented by NJDEP Fish & Wildlife. Go to dep.nj.gov/njfw/fishing/freshwater/freshwater-fisheries-forums for updates.

Operation Game Thief

In September 2021, Conservation Police Officer Andrew Riviello responded to an Operation Game Thief complaint at Strawbridge Lake in Moorestown, Burlington County.

The tip line caller estimated two men fishing by the dam with at least 75 fish in their cooler. The daily limit on panfish is 25 per person.

Officer Riviello inspected the two anglers’ catch and found they had 129 sunfish in the box, 79 fish over the daily limit. One individual also did not have a fishing license.

Summonses were issued to both fishermen, resulting in penalties of $100 each for the over-limit, and $75 for fishing without a license.

Sunfish Case Nets $275 in Penalties

In September 2021, Conservation Police Officer Andrew Riviello responded to an Operation Game Thief complaint at Strawbridge Lake in Moorestown, Burlington County.

The tip line caller estimated two men fishing by the dam with at least 75 fish in their cooler. The daily limit on panfish is 25 per person.

Officer Riviello inspected the two anglers’ catch and found they had 129 sunfish in the box, 79 fish over the daily limit. One individual also did not have a fishing license.

Summonses were issued to both fishermen, resulting in penalties of $100 each for the over-limit, and $75 for fishing without a license.
New Jersey’s FREE Freshwater Fishing Days
June 3 and Oct. 21, 2023
NJDEP Fish & Wildlife has split the Free Fishing Days. The first will be held on June 3, 2023 during the summer as is traditional. This day is part of the National Fishing and Boating Week which highlights the importance of recreational boating and fishing to enhance peoples’ quality of life and to preserve our country’s natural beauty. The second Free Fishing Day will occur after fall trout stocking on October 21, 2023 to bring attention to this great fishing opportunity. On these two days, only residents may fish New Jersey’s public fresh waters without a license or trout stamp. All other regulations, including size and daily catch limits, remain in effect.

Trout in the Classroom (TIC)
Trout in the Classroom (TIC) is a science-based program that teaches children the importance of coldwater conservation through a hands-on learning approach. More than 40,000 New Jersey students participate in the TIC program annually. Schools receive trout eggs in October from our Pequest Trout Hatchery. Students hatch and raise the trout, monitor water quality, learn fish biology, anatomy and much more as part of this cross-curricular, hands-on format. At the end of the school year students release their fish into approved streams. Trout in the Classroom is an exciting, inexpensive program enlivening year-round curricula nationwide. For more information about the TIC program, visit dep.nj.gov/njfw/education/trout-in-the-classroom.

Harmful Algal Bloom – Status Check
Stay up to date on the status of Harmful Algal Blooms (HABs) in New Jersey waters with the NJDEP Algal Bloom Sampling Status site. The easy, interactive dashboard provides current sampling results, waterbody locations and important advisory information at your fingertips. Also included are links to important HAB-related resources and a place to report a suspected HAB.
Information is updated daily at noon. Stay informed about the presence of potentially harmful algal blooms to protect you and your pets.

Visit nj.gov/dep/hab/ for more information.
Mark your calendar for the Governor’s Surf Fishing Tournament!

**May 21, 2023**

**Island Beach State Park, Seaside Park, NJ**

Enjoy a great day of surf fishing with family and friends at the Governor’s Surf Fishing Tournament while being eligible for prizes in a variety of age group and fish species categories.

The individual who catches the overall largest fish wins the “Governor’s Award” and will have their name engraved on the Governor’s Cup, which is permanently displayed at Island Beach State Park. Prizes are awarded to winners in a variety of age group and fish species categories.

All funds raised by the tournament go toward improving beach access, surf fishing instruction programs and equipment plus marine education and restoration projects.

The tournament is sponsored by NJDEP’s Fish & Wildlife and Division of Parks, Forestry and Historic Places, New Jersey State Federation of Sportsmen’s Clubs, Jersey Coast Anglers Association and New Jersey Beach Buggy Association.

Thank you to the 2022 Donors: Backwater Custom Baits, Betty and Nick’s Bait and Tackle, Body Glove, Capt. Frank Crescitelli – Fin Chaser Charters, Grumpy’s Bait and Tackle, Johnny O’s, Nick Honachesfsky, Northeast Hardcore Fishing, Mike Mende – NJ Beach Buggy Association, Stinky Balls, TAK, Tight Lines Bait and Tackle.

For more information visit: dep.nj.gov/njfw/fishing/marine/governors-surf-fishing-tournament-sunday-may-2023 or email karen.byrne@dep.nj.gov

Congratulations to Pam McGee, the 2022 Governor’s Cup Winner with a 37 4⁄8” Striped Bass!

---

**If you care about:**
- Wise management of fish and wildlife populations
- Protection and enhancement of natural lands and waters
- Preservation of traditional outdoor sports

**Then get involved!**
- Stay informed on issues affecting NJ sportsmen and sportswomen
- Make an impact on outdoor issues
- Meet others who share similar sporting interests
- Have fun and participate in Federation-sponsored activities: jamborees, clay target shoots, tournaments, dinners, conventions, and more!

**Membership:**
- $40 Includes monthly e-newsletter and $1 million excess liability insurance covering your sporting activities throughout the U.S. and Canada.

**Send with your check or money order to:**
NJFSC • P.O. Box 884 • Eatontown, NJ 07724

Eating Fish And Crabs Caught In New Jersey Waters

Fishing is an enjoyable and relaxing recreation. Fish are an excellent source of protein and nutrients as part of a healthy, well-balanced diet. Many anglers enjoy cooking and eating their own catch. However, elevated levels of potentially harmful chemical contaminants such as dioxin, polychlorinated biphenyls (PCBs), pesticides, mercury and PFOS (perfluorooctane sulfonate) have been found in certain fish and crabs in some New Jersey waters. Fish consumption advisories guide citizens on safe consumption practices.

To reduce exposure to harmful chemical contaminants when preparing and eating the fish species taken from the identified waters, it is essential to follow the guidelines provided. The DEP encourages you to consult the Fish Smart-Eat Smart Fish Advisory Guide or FishSmartEatSmartNJ.org when making decisions about eating recreationally caught fish and crabs.

The current fish consumption advisories consist of statewide, regional and water body-specific warnings for a variety of fish species and fish consumers. The New Jersey departments of Environmental Protection and Health and Senior Services have prepared "how to" electronic pamphlets on cleaning and cooking your catch to reduce your exposure to these harmful chemicals. These e-pamphlets are downloadable in multiple languages.

Do not eat fish or shellfish from a waterbody where a harmful algal bloom is present. For more information, see page 33.

For a complete list of state and federal marine fish consumption advisories visit: FishSmartEatSmartNJ.org

The fish consumption advisories and Fish Smart-Eat Smart website are updated periodically and are available online or from the Division of Science and Research at 609-940-4078 and through the Department of Health’s Food and Drug Safety Program at 609-826-4935.

Check online for fish consumption advisories on the local waterbody in which you fish! Go to FishSmartEatSmartNJ.org

NEW Interactive Map!
One click on the waterbody where you fish takes you to any current health advisories.
FishSmartEatSmartNJ.org

Instructors NEEDED!

Become an instructor with NJ Fish & Wildlife’s Hunter Education Program.

Our Hunter Education Unit wants New Jersey’s best sportsmen and sportswomen to become instructors at locations where students take the live-fire range session after first having completed the online portion. A minimum of six weekend days each year are required.

Email NJHunterEd@dep.nj.gov

Include your name, address and email address to receive an application.

Or visit our website: NJFishandWildlife.com/hunted.htm
While non-native species can have negative effects, not all non-natives are necessarily invasive species. NJ Fish & Wildlife uses the terms "potentially dangerous" and "invasive species" for non-native species whose introduction causes or is likely to cause harm to the environment, economics, or human health. Examples of impacts include:

- **Predation** — Large Snakeheads and Flatheads indiscriminately consume any fish species small enough to fit in their enormous mouths.
- **Competition** — Food, spawning areas, and habitat are sought after by invasive fish; therefore, less is available for desirable species.
- **Habitat Loss** — Plants like Purple Loosestrife or Common Reed (Phragmites) can take over a wetland making it less suitable for native wildlife.
- **Loss of Recreation** — Silver Carp threaten recreational boating in the Mississippi River Watershed as these large fish, when startled, leap high enough to intercept passing boaters.
- **Decreased Property Value** — Beautiful lakefront property can be transformed into a weed-choked monoculture once Eurasian Water Milfoil or Water Chestnut establish themselves.
- **Economic Impact** — Zebra Mussels cause millions of dollars of damage each year in the Great Lakes alone.

Before we delve deeper into the world of Aquatic Invasive Species (AIS), let’s look at two terrestrial insect invaders that most people in New Jersey have encountered. The impact of the Emerald Ash Borer can be seen as millions of ash trees across 30 states have been decimated. This destructive insect exemplifies the definition of an invasive species with a well-documented arrival, establishment, spread, and significant impact to the forests of our region. More recently, the Spotted Lanternfly has arrived. It has the potential to cause significant impact, and the New Jersey Department of Agriculture recently launched the “Join the Battle, Beat the Bug! Stomp it Out!” campaign to encourage residents to do their part.

New Jersey’s freshwater ecosystems have been invaded in recent decades as well. The Flathead Catfish, first caught by an angler in the D&R Canal...
in 1999, is now all too common throughout the Delaware River and a few of its tributaries, in addition to being found across the state in the Millstone and Raritan Rivers. Approximately 10 years later, in 2008, the Northern Snakehead and Asian Swamp Eel were first documented in NJ. The Asian Swamp Eel, fortunately, remains rather limited in its distribution, but the Snakehead population took off like the Spotted Lanternfly, spreading quickly throughout the region.

In New Jersey, thirteen species or groups of fish are regulated as potentially dangerous, and the possession of live individuals or their release when caught is prohibited. These species include Asian Swamp Eel, Bighead, Grass (diploid), and Silver Carp, Blue and Flathead Catfish, Round Goby, Brook Stickleback, Green Sunfish, Oriental Weatherfish, Snakehead, Warmouth, and all black bass except for Largemouth and Smallmouth Bass.

Since its introduction, the Snakehead is probably the most recognized invasive fish species. NJ Fish & Wildlife biologists have actively monitored and documented the growth and spread of the species throughout the Delaware River basin since first documented. New and emerging species, like the Snakehead, are fascinating to study, especially those that have the potential to reshape the ecological interactions of species and habitat. Studies ranging from age and growth, population growth and distribution, and diet studies are currently being utilized to ascertain the long-term impacts of the species. Today's technological advances, such as eDNA (environmental DNA), have provided fish and wildlife agencies with the tools to detect emerging threats more efficiently. Environmental DNA is the detection of DNA released by an organism into the environment through feces, mucous, skin, and carcasses. Through eDNA, species presence can be detected from a water sample.

As previously mentioned, not all non-native species are considered invasive. Although non-native, recreationally important species such as Largemouth Bass, Channel Catfish, Bluegill, and Rainbow Trout are not considered invasive species. They have been around for more than a century with widespread reproducing populations (naturalized) and/or are considered a valuable natural resource in almost all waters of the state. There is an emphasis on the word most, as there are places where they do not belong. There are certain interactions between these naturalized non-native species and sensitive native species that NJ Fish & Wildlife prefers to minimize or prevent. One example is the competition and/or predation exerted upon our native Brook Trout by other non-native salmonids such as Brown or Rainbow Trout. A second example is found within the sensitive and naturally acidic waters of the Pinelands. Although widely protected from development, this fragile landscape is a refuge to a suite of unique native flora and fauna (such as Blackbanded Sunfish). Non-native and invasive species introductions here would cause irreparable harm to these areas. Therefore they are generally not managed for or stocked with non-native species, even those that have become naturalized.

Transferring any fish species into any water-body can have serious consequences. Regardless of whether a fish is regulated as an invasive species or not, it is important to recognize that the action of moving fish is illegal and most often irreversible. The damage can take many forms including harm to both game and nongame species populations. Fisheries management strategies can be undermined with the best of angler intentions. Native Brook Trout populations suffer and are at times lost when Brown Trout move or are moved into native Brook Trout waters. Highly predatory species can deplete forage bases. Species such as Alabama Bass and Spotted Bass have been deemed invasive outside of their native range due to the severe impacts they have on Largemouth and Smallmouth Bass. In fact, they are known to dominate a fishery, outcompete more desirable species, and are prone to stunting, meaning they become overabundant and remain smaller than anglers generally enjoy fishing for.

For NJ Fish & Wildlife, the species officially regulated as potentially dangerous can cause severe impacts and are unwanted in all waters. Not all species pose the same threat level and are at different stages of invasion. Some species, like the Green Sunfish, are widely distributed throughout the state. Others, like the Snakehead, are confined to the Delaware River and tributaries. A Blue Catfish has recently been caught by an angler and the Round Goby has not yet been encountered. Protecting native species and their habitat is of utmost importance to the agency.

What Can You Do?

The angling community plays an important role in protecting New Jersey’s native species and recreationally important non-natives by following the guidelines established under the Potentially Dangerous Fish regulations.

- The possession or release of live, potentially dangerous fish is PROHIBITED.
- Anglers must destroy all species encountered and must not return them to the water.

Transferring any fish species into any water-body can have serious consequences. Regardless of whether a fish is regulated as an invasive species or not, it is important to recognize that the action of moving fish is illegal and most often irreversible.

Although an invasive species, Common Carp are NOT regulated as Potentially Dangerous as they are already found in the vast majority of waters throughout the state. As such, carp do not have to be destroyed when caught by anglers. Unfortunately, a portion of the angling community continues to release invasives back into the water, which is to the detriment of New Jersey’s freshwater resources. Invasive species are likely to cause environmental harm to the state’s fisheries resources by outcompeting preferred game fish species. Some invaders' presence and impact are obvious when one sees a stand of dead ash trees due to the Emerald Ash Borer or hundreds of Spotted Lanternflies littering your backyard and feeding on trees. What lies beneath the water is far less tangible to most, and species like the Snakehead continue to spread at alarming rates. The long-term effects of practicing catch-and-release are yet to be seen, and only time will tell how much of an impact these invasive predators will have on the aquatic ecology of the state. Do your part, and please do not release the potentially dangerous invasives!

Regardless of whether or not a fish is regulated as an invasive species, NEVER relocate or stock ANY FISH without an approved Fish Stocking Permit regardless of species. Please help us manage and protect our waters for future generations to enjoy!
TROUT STOCKING
Raised with pride at NJ Fish & Wildlife’s Pequest Trout Hatchery.

Spring
- Over 180,000 released for Opening Day — April 8, 2023
- Over 570,000 Rainbow Trout (avg. 10.5 inches)
- Spring stocking begins March 20, 2023
- An additional 6,000–7,000 breeders 15–21 inches (3–7 pounds)
- 85 streams and 87 lakes stocked statewide
- All 21 counties stocked
- Most waterbodies stocked at least 3 times
- Stocking continues for seven weeks following Opening Day!

Fall
- Fall Stocking begins October 10, 2023
- All large, two year old trout, measuring 14–16 inches
- 21,000 trout stocked
- 36 streams, lakes and ponds
- Up to 1,000 breeders, averaging 20 inches
- Great fishing till next spring!

Winter
- November 20 and 21, 2023
- All large two year olds, measuring 14–16 inches
- Over 4,000 trout
- 18 lakes and ponds
- Great fishing all winter long!

NEW Trout Stocking Hotline
609-322-9524

Fish Stocking Do's and Don'ts

Why should I get a Fish Stocking Permit?
It is the law! Before you consider stocking any fish in New Jersey, you must first obtain a fish stocking permit from NJDEP Fish & Wildlife. It does not matter whether the pond is public or private, connected to, or isolated from, a neighboring water, or if the waterbody is stocked by the state or a private club. A fish stocking permit is always required.

An application and information can be found at dep.nj.gov/njfw/fishing/freshwater/fisheries-permits. The application fee is only $2.

Only approved hatcheries will be authorized for stocking. Hatcheries are required to submit annual fish health information, thus minimizing the potential for the spread of disease.

Fish Stocking Do's
- Do establish your stocking goal, whether it is to supplement an existing population, create a unique opportunity or restore a fishery (dredging or dam repair project).
- Do know your waterbody. Most fish require particular conditions, so understand your waterbody’s habitat and water quality. Factors to consider include waterbody size, depth and substrate, and water temperature, oxygen level, pH and flow.
- Do get permission from the waterbody owner, as their signature is required on the application.
- Do avoid delays in the processing of your application by first reviewing the nine simple guidelines listed at dep.nj.gov/wp-content/uploads/njfw/fisheries_permitapp_info.pdf

Fish Stocking Don'ts
- Don't purchase fish from a hatchery without obtaining a fish stocking permit.
- Don't transport fish from one waterbody to another.
- Don't assume your pond needs to be stocked, as most waters do not require stocking.
- Don't stock an invasive species dep.nj.gov/njfw/fishing/freshwater/aquatic-invasive-species
- Don't assume common game species are harmless. Even they can cause ecological harm if introduced into the wrong locations.
- Don't release pet aquarium fish into a local waterway.
HATCHERY-SUPPORTED FISHERIES

NEW JERSEY'S STOCKING PROGRAMS

NJFISHANDWILDLIFE.COM

**FREE Fishing Days**
— June 3 and Oct. 21, 2023 —

No License Needed!
(see page 33)
The Skillful Angler Program is designed both to supplement the New Jersey Record Fish Program and to acknowledge that many anglers catch freshwater and marine fish that are not record size but are still worthy of recognition because the size and weight of the fish sufficiently tested the angler’s skill. Open to resident and non-resident anglers. All fish must be caught in New Jersey waters using a hook and line during legally open seasons.

Saltwater species taken from a boat must have been caught from a boat that left from, and returned to, a New Jersey port during the same trip. Anglers can now submit their application and photo(s) electronically! Program rules and steps to enter are found at dep.nj.gov/njfw/fishing/freshwater/skillful-angler-program. Anglers qualifying for a Skillful Angler award receive a certificate along with a Skillful Angler patch as a testament to their achievement. The Program has three main divisions: Adult (for anglers age 16 and older), Junior (under age 16) and Catch and Release (based on length). A clear, side-view photo alongside a ruler that allows accurate species identification and measurement verification must be included with each application. Additional good quality (and high resolution) photos with the angler are welcome and appreciated.

The Skillful Angler Program recognizes different levels of fishing expertise. An angler who submits five applications of qualifying size for the same species will receive a Specialist Certificate. An angler who submits five applications of qualifying fish of different species will receive a Master Certificate. Catch 10 or more qualifying fish within the year, and the angler will earn an Elite Angler Certificate.

For new anglers, the Program also recognizes your first fish caught no matter the age of the angler. Qualified anglers will receive a First Fish certificate. Three additional categories may bring out your competitive nature. Personalized certificates are also awarded for the Slam Series which includes:

- **Trout Slam** — catch one each qualifying rainbow, brook and brown trout
- **Bass Slam** — catch one each qualifying small and largemouth bass
- **Panfish Slam** — catch one each qualifying sunfish, crappie and yellow perch.

Each month, the leaders of each category and species will be posted on our Skillful Angler Leader Board webpage. At the end of the year, special recognition is given to anglers who catch the largest fish in each species category. The winner of each category is sent a special certificate recognizing his/her accomplishment along with a winner’s patch as the best of New Jersey’s Skillful Anglers.

Fish must be measured from the tip of the nose (with mouth closed) to the tip of the tail. For catch and release categories, the fish must be measured and photographed alongside a ruler. For Adult/Junior Division, fish must be weighed and measured by a fishing license agent, tackle shop or authorized NJ Fish & Wildlife fisheries biologist.

Anglers must submit a photograph of the fish caught, alongside a ruler for clear identification and measurement verification. Be sure the ruler markings are legible. Please also include an attractive, well-composed, high-resolution (large file size) photo to be considered for printing in this Digest. Smile! All photos become the property of the NJ Fish & Wildlife and may be used for promotional purposes.

To apply, go to dep.nj.gov/njfw/fishing/freshwater/skillful-angler-program

The New Jersey State Record Fish Program requires a separate application from this Skillful Angler Program and is based on weight alone. Scale certification documentation and a weighmaster’s signature are necessary. Other rules apply. Visit NJ Fish & Wildlife’s website at NJFishandWildlife.com for a complete list of current state records.
NJDEP Fish & Wildlife’s Record Fish Program honors anglers who catch the largest of select species of freshwater and saltwater fish. Record size is based on weight alone; there are no line classes. Currently there are 31 freshwater species eligible for entry into the program.

Anglers are reminded that the objective of the Record Fish Program is to increase the awareness of fishing opportunities for species that are regularly sought and routinely found in the freshwaters or off the coast of New Jersey.

Anglers should also be aware that several procedural changes are now in effect for the Record Fish Program. First, there are different applications for freshwater and saltwater species. Second, for freshwater species, it is now mandatory that a freshwater biologist confirm the identification and weight of any potential record fish within three days of it being caught. Anglers must call NJ Fish & Wildlife’s Bureau of Freshwater Fisheries (north) 908-236-2118; (central) 609-233-6076; and (south) 856-629-4950, or the Hackettstown Hatchery at 908-852-3676 (Warren County) to make arrangements. Hours are Monday–Friday, 8:30 a.m.–4:30 p.m. These offices have a certified scale on site, so an entry can be weighed and identified. Depending on the time and location of your catch, you may elect to have the fish weighed on a local certified scale, but you must still have a freshwater biologist personally confirm the identification and weight at one of the above offices. Please note that all scale certification requirements still apply, including a valid Certificate of Inspection/Test Report and current Registration Certificate issued by the county Office of Weights and Measures. Please also include an attractive, well-composed, high-resolution (large file size) photo to be considered for printing in this Digest. Smile!

Entry deadline: Applications must now be submitted no later than one month after the date of catch. All other program rules still apply.

For a complete list of state record fish or to print an application with complete program rules, visit NJ Fish & Wildlife’s website at dep.nj.gov/njfw/fishing/freshwater/new-jersey-state-record-fish-program.

* Denotes historical record
** Denotes fish has been certified by the IGFA as a world record

---

Andy Tintle caught the 4lb. 8oz. state record Black Crappie while fishing from his boat on Pompton Lake in May of 1996.
Beat The Fall Rush!
Take Your Hunter Education Class This Spring!

Hunter Education has GONE ONLINE!

You’re just 5 steps away from hunting in NJ
1. Complete the online course at huntercourse.com/usa/newjersey/.
2. Pass the test and print your voucher
3. Register for a live fire session at NJFishandWildlife.com/hunteredregistration.htm
4. Attend a live fire session.
5. BUY YOUR LICENSE!

NOTE: The New Jersey Study Guide/Workbook will NOT be accepted.

For more information, visit dep.nj.gov/njfw/hunting/hunter-education
Questions, email NJHunterEd@dep.nj.gov or call the Hunter Education office at 856-629-0552.

Looking for a place to fish in the Garden State?
The Great Fishing Close to Home app will help you select from more than 290 lakes, ponds and reservoirs.

Looking to target a particular species? Use the app’s search feature to identify opportunities for various species. For each waterbody, information includes location, size, primary game fish species present, ownership, any special permit requirements, if outboard motors are permitted along with other amenities such as a boat ramp, swimming area, picnic area and camping. You are only a few clicks away from Great Fishing Close to Home. Visit www.njfishandwildlife.com/greatfishing/
Welcome to Fishing! To Get Started…

A fishing license is required for residents ages 16 through 69 years and for non-residents 16 years and older. Fishing for trout also requires a Trout Stamp. Purchase your license and stamp online at https://nj.aspirafocus.com/internetsales or at tackle shops and sporting goods stores statewide. If you never purchased a fishing license, or have not since 2011, you are eligible to save almost 50% of the fee when you and another qualified individual purchase a “Buddy License” at the same time. Both anglers receive the discount! See page 10 for details.

New Anglers’ Fishing Gear Checklist

Gather this essential gear, then consider adding the recommended accessories to complete your new angler package. Everything can be found at a local tackle shop or sporting goods store.

Essential Gear

- NJ Fishing License
- Rod and Reel – A 6 to 7 foot-long spinning rod and reel with 8 lb. test line (monofilament).
- Hooks, Bobbers and Split Shot – Size 6 bait holder hooks (1 pkg.), 3 or 4 bobbers and a package of split shots.
- Bait – Nightcrawlers or earthworms (great choice, readily available, catch nearly everything) or try live minnows or shiners.
- Lures – Artificial lures can replace bait and be just as effective. Try size 1 or 2 silver spinners.
- Needle-nose Pliers with Line Cutter – To remove hooks from the fish and to cut line when needed.

Recommended Accessories

- Polarized Sunglasses – Protect your eyes and reduce glare off the water.
- Hat and Sunscreen
- Net – Don’t let the big one get away. Use a net to help land your catch and to protect fish that will be released.
- Tape Measure – To determine if your fish is large enough to keep.
- Camera – Take photos of your catch to share with family and friends.

NJ Fish & Wildlife Digest – Contains images for commonly caught fish plus fishing regulations.
Getaway to Angling

Fly Fishing • Lake Fishing • Ice Fishing

Some of the best fishing spots in upstate are found in Oneida County. Oneida Lake is a bass master’s dream and a special destination for walleye and perch. Fly fishing? Cast for brook and brown trout in over 100 miles of public fishing rights on 14 trout creeks and rivers. West Canada Creek is regarded as one of New York’s top trout streams. See millions of trout nurtured at Rome Fish Hatchery.

New Jersey is Hooked on Fishing, Not on Drugs

The Hooked on Fishing – Not on Drugs program will:

• Teach kids fishing and create opportunities to expose them to aquatic ecology, freshwater and marine careers
• Build self-esteem and confidence
• Develop problem-solving skills about their local environment
• Nurture outdoor recreation skills to avoid the pitfalls of drug and alcohol use

njfishandwildlife.com
