DIRECTOR'S MESSAGE

Welcome to the Nevada Upland Game hunting regulations.

The annual ramp up to bird season is a tangible thing in my household and can be felt in the raising energy levels of my wirehairs. As anyone with bird dogs can understand, they seem to know that cooler fall temperatures mean bird season is coming. On an average year my personal anticipation also tends to run high but given this extraordinarily wet winter I am almost giddy with the promise of an above average bird year.

The benefits of this exceptional wet year cannot be overstated. The moisture and resulting range conditions across Nevada have created a scenario where brood success and resulting bird production should provide good numbers of birds and abundance of hunting opportunities.

Nevada, with its 86 percent public lands and diverse upland species, offers an unparalleled hunting experience.

From the majestic mountains across the sweeping valleys and into the craggy canyons, this great state presents a variety of areas for all to explore. As you travel across Nevada's wildlands, you will encounter a multitude of upland game species, each with its unique allure and challenge. Nevada provides opportunities to pursue Himalayan Snowcock across the peaks of the Ruby Mountains or chukar through the canyons or quail in the valley bottoms.

Remember this hunting season is another opportunity to introduce the next generation to bird hunting through our exclusive youth hunting seasons. The upland and waterfowl youth seasons provide an opportunity to focus on our young hunters, allowing them to experience the joys and challenge of the hunt. These hunts help kids learn the skills, values, and respect for nature that hunting instills.

As you read through this year's Small Game Hunting Regulations & Seasons, remember that these regulations help to ensure that future generations can enjoy the same awe-inspiring experiences we have the privilege to enjoy today. Responsible hunting not only contributes to the conservation of these magnificent species but also supports the delicate balance of our ecosystems.

So, ready your shotguns, prepare your pointing dogs, and embrace the excitement that awaits you amidst Nevada's breathtaking landscapes. From the spirited laughter of youth hunts to the pulse-quickening moments with our trusted canine companions, this extraordinary wet year has set the stage for a bird hunting experience that will stay with you long after the final shot has been fired.

Happy hunting!

Sincerely,

Alan Jenne

Director, Nevada Department of Wildlife

This is a photo of one of my favorite hunting dogs Boone. He's no longer with us, but I always smile when I think about all the time the two of us spent chasing birds. I wanted to use this picture in honor of all of the hunting dogs that have come in and out of our lives. They really are our best friends and hunting partners.

WHAT'S NEW THIS YEAR

Sage-grouse

- In Elko County, hunt units 075, 101 and 102 are open once again with season dates from September 23rd through October 1st and a daily and possession limit of 2 birds.
- In Nye and Lander County, hunt units 172 and 173 are open once again with season dates from September 23rd through the 24th with a daily and possession limit of 2 birds.
 - » Hunt Units 161 and 162 of Nye, Eureka and Lander County are closed for the 2023 season.
- In Washoe County, hunt unit 015 is open once again with season dates of September 23rd through the 24th with a daily and possession limit of 2 birds.

Wild Turkey

- A new hunt opportunity for hunt unit 091 in Elko County will be available in the spring of 2024.
- A new hunt opportunity for hunt units 103 and 108 in Elko County will be available in the spring of 2024.

- In Lincoln County, the hunt area will be split into two unit groups consisting of hunt units 223 and 231, and hunt units 241 and 242. This will lead to greater hunt opportunities in the future and reduce potential hunter congestion in some locations.
- In Lyon County, that portion of hunt unit 202 will be open for the first time with 2 tags available in 2024.

Bobcat Pelt Sealing Dates and Times

- Some modifications were made to bobcat pelt sealing dates and times. Please consult the Furbearer Regulations for details. Of note, there will not be an opportunity to seal pelts in Eureka this year. In Ely, the location of the sealing has been changed from the Ely NDOW office to the newly acquired Blue Diamond property located at 2018 Pioche Highway in Ely, NV 89301.

HUNTERS MUST RESPECT PRIVATE PROPERTY

Nevada is more than eighty percent public land, almost all of it open to hunting, but some sportsmen still mistakenly enter private property. The Nevada Department of Wildlife (NDOW) receives reports every year of hunters trespassing, damaging private property and even releasing livestock from pastures or private property.

"Trespassing is an ongoing issue," said Kristy Knight, Chief Game Warden for NDOW. "If someone is convicted of hunting/fishing/trap-

ping trespass, they receive 6 demerit points, a fine, and may lose any animal harvested or equipment used. Respect private property. Request access, accept and respect the private property owner's answer."

The Nevada Department of Wildlife wants to remind everyone that hunting on someone else's land is a privilege, not a right. Common courtesy can go a long way towards establishing good hunter-landowner relations in the future. Refer to NRS 207.200 and 503.240 for more information.

TRESPASS DEFINITION

It is considered trespassing if a person willfully goes on or remains on any land after having been warned by the owner or occupant not to trespass. This "warning" can include the following:

- Painting with fluorescent orange paint on the following:
 - » A structure or natural object or the top 12 inches of a post, at intervals of such a distance as is necessary to ensure that it is within the direct line of sight of a person standing next to another such structure, natural object or post.
 - » Each side of all gates, cattle guards and openings that are designed to allow human ingress to the area;
- Fencing the area;
- Posting "no trespassing" signs or other notice of like meaning at intervals of such a distance as is necessary to ensure that at least one such sign would be within the direct line of sight of a person standing next to another such sign, and each corner of the land.
- Using the area as cultivated land. "Cultivated land" means land that has been cleared of its natural vegetation and is presently planted with a crop.

TIPS TO USE WHEN HUNTING ON PRIVATE PROPERTY:

- Access to and across private lands is a privilege granted by the landowner. Not all roads are public roads. Traveling on private roads without permission to access other lands is akin to someone walking through your house to reach a neighbor's home.
- Bring a good map showing private and public land ownership. Know where you are. Internet map sources may not be very accurate and there may be no cell service in rural areas.
- Build good relationships with land owners by asking permission.
- Leave gates the way you find them and make sure everyone in your party knows that. If a rancher wants a gate left open, it will be hung back on the fence, not lying on the ground.
- Leave the land better than you find it – pick up all trash you find and take it with you.
- Camp away from water sources for the benefit of wildlife and livestock.
- Report hunter misconduct. Misbehaving hunters jeopardize the use of resources for all hunters.
- Stay on existing roads.
- When granted access, bring only the number of hunters expected by your host.
- Respect locked gates, no trespassing signs and orange-painted gate posts. They all mean stay out.
- Do not attempt to remove or relocate livestock or wildlife.
- Send a thank you note.

REGULATIONS

UPLAND GAME BIRD, RABBIT, DOVE, AND CROW

In Nevada, upland game bird species include dusky, sooty, and ruffed grouse; sage grouse; chukar and Hungarian partridge; Himalayan snowcock; ring-necked pheasant; California, Gambel's, and mountain quail; and North American wild turkey.

Small game species include cottontail, and white-tailed jackrabbits. Falconry seasons are in effect for waterfowl (all migratory bird stamp requirements apply), dove, chukar, sage, blue and ruffed grouse, pheasant, Himalayan snowcock, Hungarian partridge, quail, and rabbit.

Youth seasons include chukar and Hungarian partridge, California and Gambel's quail, and cottontail, and white-tailed jackrabbits.

NRS 502.010 AS IT PERTAINS TO UPLAND GAME YOUTH HUNTS

- A license to hunt or fish is not required of a resident of this State who is younger than 12;
- It is unlawful for any child who is younger than 18 to hunt any wildlife with any firearm unless the child is accompanied at all times by the child's parent or guardian or is accompanied at all times by an adult person authorized by the child's parent or guardian to have control or custody of the child to hunt if the authorized person is also licensed to hunt.

SMALL GAME HUNT QUESTIONNAIRE

The small game hunt questionnaire (upland game birds, rabbits, and waterfowl) can be found online in February of each year at ndowlicensing.com. Even though this is a voluntary questionnaire, we encourage those sportsmen that pursue these species to do their best to track their hunting excursions in terms of number of days hunted, what county they hunted in and how many animals were taken. These surveys typically close around the end of April. This information is instrumental in helping the Nevada Department of Wildlife determine harvest estimates each year and make recommendations for upcoming seasons and bag limits.

BLACKBIRD

The crow (17.5 inches) is bigger than a blackbird (9 inches) and noticeably smaller than a raven (24 inches). Crows often flock, while ravens are more solitary birds. Note that the crow's bill is much smaller than the raven, and that its tail is square. The raven's heavy bill, shaggy throat feathers and wedge-shaped tail also set it apart from the common crow.

BLUE GROUSE (DUSKY AND SOOTY GROUSE)

Range in size from 15 to 20 inches and weigh from 26 to 46 oz. Dusky grouse inhabit central Nevada from around Austin, east to the Nevada/Utah border and north to the Idaho/Nevada border. Sooty grouse inhabit extreme western Nevada along the California/Nevada border in mountain ranges such as the Carson Range, Sweetwater and White Mountains.

CHUKAR PARTRIDGE

Nevada's most popular upland game bird. Widely distributed across the state and much of the Great Basin. Coloration is grayish brown with a buff belly. Chestnut and black barring on flanks with a black line through eye connecting at the throat. Length is 13.4 to 15 in and weighs from 19-27 oz. Inhabits steep, rocky habitat exemplified by talus slopes and cliffs.

RUFFED GROUSE

Reddish-brown or gray with dark bars and spots. Weighs between 16 and 26 oz. and is much smaller than a blue grouse. Translocated populations exist in northeastern, central and portions of northwestern Nevada.

RING-NECKED PHEASANT

Males are a strikingly beautiful bird with a distinctive green iridescent neck, red face and white collar around the base of the neck. The body has a copper coloration with black spots and the tail is long and pointed with black barring. The female is dull brown in coloration with black spotting on the sides and a shorter tail than the males. Ranges in size from 19.7-27.6 in in length and weighs from 17.6-105.8 oz.

HUNGARIAN PARTRIDGE

Officially known as the "Gray Partridge". Ranges in size from 11.8 to 13 inches in length and from 13.6 to 17.6 oz. Grayish brown with chestnut barring on wings, dark reddish U-shaped patch on belly and a reddish throat patch.

HIMALAYAN SNOWCOCK

A large upland game bird introduced into Nevada in 1963. Ranges in size from 22-29 inches and weighs from 4.4 to 6.8 lbs. Gray in color with a white throat and chestnut stripes on the sides of the head. Sexes are monomorphic except for size where the female is smaller in stature. Only exists in Nevada's Ruby Mountains and East Humboldt Range in North America.

GREATER SAGE-GROUSE

The mating display of sage-grouse is very distinctive as the males inflate large yellow air sacs surrounded by white pin feathers and create a series of odd plops and swishing sounds. Males also fan out their spiny tail feathers during the display. Their coloration closely resembles their habitat with a grayish brown appearance and white mottling throughout. Males can be almost twice as large as females. Range in size from 22-29.5 inches in length and weigh between 3.1-6.4 lbs. Lifespan is from 3-6 years with females tending to be longer lived than males.

MOUNTAIN QUAIL

The top knot of this species is straight and long compared to California or Gambel's quail. Chestnut throat patch and chestnut flanks with white bars are distinctive of this species. Ranges in length from 10.2 to 12.2 inches and weight from 6.7-9.2 oz.

GAMBEL'S QUAIL

Distribution in Nevada includes Clark, Lincoln and Nye Counties. Similar in color pattern and size to California quail, but male Gambel's quail have a prominent black belly patch. Range in length from 13.4-14.2 in. and weigh between 5.6-7.1 oz.

CALIFORNIA QUAIL

Length is from 9.4 to 10.6 inches and weighs in at 5-8 oz. Males are distinguishable from females by the black face outlined in bold white stripes and the larger, comma shaped head plume or "top knot" while females are plainer brown and lack the facial markings and have a relatively shorter and fairly straight top knot.

WHITE-TAILED JACKRABBIT

This species is often mistakenly called a "Snowshoe" rabbit. The summer pelt coloration is brownish with some black and can appear gray in color. This species turns white in the winter, but maintains the black tips on its ears. The tail is white, which is a distinguishing characteristic that differs it from the more common black-tailed jackrabbit. This is the largest rabbit in Nevada and is between 22 to 26 in. in length and weighs between 6.6 to 13 lbs.

COTTONTAIL RABBIT

Nevada has two species of cottontail rabbits, mountain cottontail and desert cottontail. Ranges in size from 14 to 17 in. in length and weighs from 1.5 to 2.6 lbs. The ears are relatively short compared to jackrabbits and are smaller in size. The feet of cottontails are densely covered in fur. Overall coloration is pale brown with black-tipped ears, a white underside and white to grayish white tail.

PYGMY RABBIT

A sagebrush dependent species relegated to the sagebrush range in the western U.S. The world's smallest leporid that weighs between 0.8 and 1.1 lb. and ranges in length from 9.3 to 11.6 inches. Has short ears, gray color, small hind legs and has no white fur on tail, a distinguishing characteristic from cottontail rabbits.

REGULATIONS

MIGRATORY GAME BIRD

In Nevada, migratory game bird seasons are established for ducks and mergansers, coots and gallinules, snipe, Canada and white fronted geese, snow geese and Ross' geese. Migratory waterfowl are a subgroup of migratory game birds, and include ducks, mergansers, geese, and swans.

STAMP REQUIREMENTS

A Federal Migratory Game Bird Hunting Stamp (\$28 at ndowlicensing.com) is required for any person age 16 or older who hunts any migratory waterfowl (ducks, mergansers, geese, and swans).

Note: Shotguns must be plugged to limit overall shotshell capacity to 3 when hunting all migratory birds. (Note: See Snow and Ross' geese season for exception.)

SPECIES ID

Head or fully feathered wing must remain attached to bird while in transit from the field to the hunter's residence for ducks, mergansers, coots and gallinules, snipe, geese, and swan.

HIP NUMBER

Any person, except a Nevada resident under 12, who plans to hunt any kind of migratory game bird, including ducks, geese, swans, coots, dove, snipe, or gallinules in Nevada this year, is required to ANNUALLY obtain a Harvest Information Program (HIP) validation number and write it on their hunting license before entering the field. The validation number is free and is available by going online to ndowlicensing.com or calling 1-855-542-6369. The U.S. Fish and Wildlife Service is conducting the nationwide harvest survey.

Additionally, NDOW would like migratory bird hunters to complete an online questionnaire at the conclusion of the season.

SMALL GAME HUNT SURVEYS

The small game hunt questionnaire (upland game birds, rabbits, and waterfowl) can be found online in February of each year at ndowlicensing.com. Even though this is a voluntary questionnaire, we encourage those sportsmen that pursue these species to do their best to track their hunting excursions in terms of number of days hunted, what county they hunted in and how many animals were taken. These surveys typically close around the end of April. This information is instrumental in helping the Nevada Department of Wildlife determine harvest estimates each year and make recommendations for upcoming seasons and bag limits.

MID-SEASON CLOSURES

All waterfowl season will be closed the following days:

- Northeast Zone closed Nov. 29 - Dec. 8, 2023
- Northwest Zone closed Jan. 8-9, 2024
- South Zone closed Oct. 23-24, 2023

FEDERAL MIGRATORY BIRD STAMP

The Federal Migratory Bird Stamp is now an electronic stamp privilege. The physical stamps are NO LONGER available at NDOW offices or NDOW license agents that sold them in the past. However, the US post offices will continue to sell the physical stamp. You can purchase your electronic Federal Migratory Bird Stamp privilege at the NDOW Online Consumer site (ndowlicensing.com), at NDOW offices, and from most license agents. The privilege is valid for 45 days to allow for receipt of the physical Federal Migratory Bird stamp in the mail from the USFWS. Once the physical stamp is received it must be signed and affixed to the license. For assistance, contact NDOW's License Office at Toll Free 855-542-6369.

A falconry licensee shall not intentionally release a raptor after any wildlife which is in a refuge or in a state or national park or is on privately owned property where the falconry licensee does not have permission to hunt. A falconry licensee may fly a raptor at an animal raised in captivity and at any species of

All hunters will check in at the main entrance on the opening day of waterfowl season. For the remainder of the waterfowl season, hunters will complete a reservation card obtained from the Frenchy Lake or Nesbitt Lake check station box and deposit the card in an appropriate drop box for each day hunted. Failure to turn in a completed card at the Key Pittman WMA or failure to check out at the Overton WMA may result in a citation being issued, and the loss of hunting privileges for the remainder of the season. No vehicles are allowed on the areas during the hunting season.

3. During the waterfowl season at the Overton WMA, an assigned hunt location program

will be in effect. Hunters will make a reservation for one of three types of hunt locations (field, pond or bulrush plot) and the specific hunt location will be determined by a drawing at the check station prior to each day's hunt. NDOW reserves the right to adjust blind availability and blind assignments based on the conditions present on the day of the hunt.

4. A hunter with a reservation will be considered as a "no-show" if they do not present themselves at the check station by one full hour before shooting time, except that at the Overton WMA, a hunter with a reservation will be considered a "no-show" if they do not present themselves at the checking station one and one-half hours before shooting time during the waterfowl season.
5. Standby hunters must register at the check station upon arrival.
6. All reservations, permits and assigned hunting locations are nontransferable.

The State of Nevada through the Department of Wildlife owns or has long-term leases on more than 155,000 acres of land incorporated into wildlife management areas (WMAs) across the state. COMMON VIOLATIONS

The vast majority of hunters, trappers, and anglers do their best to abide by the wildlife laws and regulations. For those people who fail to follow the law, convictions of wildlife law may carry serious penalties, including criminal fines up to \$5,000, jail, civil penalties up to \$30,000, loss of equipment and lost license privileges.

The following are a list of the seven most common violations in the field. Check twice, take due care, and you can avoid unnecessary citations, costly fines and loss of equipment and hunting privileges.

If you make a mistake — for example shooting a spike, or small forked-horn deer instead of an antlerless deer — report it immediately to the local game warden or *Operation Game Thief (OGT)* at 1-800-992-3030 or refer to the *NDOW TIP APP* on page 42. Follow any instructions that are provided to you and wait for the warden to arrive. Taking the opposite approach, such as hiding or wasting game, will carry much more serious consequences.

1. Loaded Rifle or Shotgun In/On Vehicle

Nevada law prohibits carrying loaded rifles and shotguns in or on vehicles, including ATVs, motorcycles, and snowmobiles. After hunting on foot, unload the gun before placing it in or on the vehicle. **This is a misdemeanor offense.**

2. Using Tag of Another

This is a surprisingly common violation. Only the person named on the tag may use or possess the tag. **This violation is considered a felony offense if an animal is harvested.**

3. License and Tag Fraud

Providing false information (for example, claiming to be a Nevada resident, using a false date of birth, or fictitious name, etc.) to obtain a license is a **misdemeanor**. Providing false information to obtain a big game tag is a **gross misdemeanor**, and killing a big game mammal with such a tag is a felony. This activity steals tags from lawful sportsmen.

4. Early/Late Shooting

Do not shoot at game before or after the designated legal hunting hours. Check the sunset/sunrise and hunts by species table. Sunset does not mean dark! (Refer to legal hunting hours by species on page 45. Also see sunrise/sunset tables pages 45-48. **This is a misdemeanor offense.**

5. Failure to Properly Punch Tag or Permit Immediately After Taking Game

Upon reaching game, **immediately** validate (punch) the tag or permit with a knife or other sharp object. Marking it with a pencil or pen is not acceptable. **This is a misdemeanor offense.**

If a tag is used to kill more than one animal, the crime is punishable as a category E felony and all equipment used in the crime is subject to forfeiture, including guns and vehicles.

6. Possessing an Over Limit of a Species

Possession Limit is the maximum number of a species that one person can legally take and control at any one time—this includes animals held in the freezer and ice chest. **Daily Limit is the maximum number of a species that is allowed to be harvested in any given day.**

7. Unplugged Shotgun

Waterfowl and dove hunters may not use shotguns capable of holding more than three shells. Shotguns must be plugged and rendered incapable of holding more than three shells. **Shotguns must also be plugged in all Wildlife Management Areas regardless of species. This is a misdemeanor offense.**

BLM INFORMATION

The Bureau of Land Management (BLM) in Nevada encourages hunters to call in advance of hunting season to find out if land management practices will be conducted during the hunting season. While BLM field offices are aware of hunting seasons, some management activities, such as prescribed burns, wild horse gathers, road closures or fire restrictions may temporarily disrupt hunting activities.

Call Before You Hunt

If possible, call the appropriate BLM office before you send in your hunt area requests. That way you may avoid an area that may have some access restrictions or other changes because of management activities. It's a good idea to call BLM just before the hunt to find out if any unplanned restrictions from fire or emergency wild horse gathers are in effect.

Responsible Hunting in Wilderness and Wilderness Study Areas (WSAs)

Some units contain BLM lands designated as wilderness or wilderness study areas. Motor vehicle use—trucks, ATVs and motorcycles—is not allowed unless signs are placed to indicate a designated route. The motorized vehicle rule extends to mechanized vehicles such as game carriers, which are also not allowed in these areas. Hand-held GPS units are allowed.

Responsible Off-Highway Vehicle Use

There has been a big increase in the use of OHVs by hunters. While most areas of the public lands are designated as open to OHV use, cross-country travel on OHVs is causing unnecessary damage to habitat that wildlife depend on. OHV riders are asked to stay on existing roads and trails. If it is necessary to drive off roads to retrieve and pack out harvested game, hunters are asked to use care and avoid creating new routes.

HOW TO USE THESE TABLES

Many Nevada hunting regulations restrict the activities to specific times. The laws and regulations may specify sunrise to sunset, one half hour before sunrise to sunset, one hour before sunrise to two hours before sunset, etc.

Consult the specific regulation pamphlet for the activity you are interested in. These are available at all NDOW offices and most license agents. Then use the sunrise/sunset table for the location nearest where you are going to carry on the activity to determine the legally authorized time to start and/or stop your activity. These tables are accurate in the vicinity specified with less than a two (2) minute error. These tables are Pacific Standard Time, so do not forget to add one hour for daylight savings time from March 12 - Nov. 5.

Please Note: A more complete listing of sunrise/sunset tables is available at ndow.org.

LEGAL HUNTING HOURS BY SPECIES

Migratory Birds	1/2 hour before sunrise to sunset
Small Game and Upland Game	Sunrise to sunset, EXCEPT for quail in Pahrump Valley of Nye County (8 a.m. to sunset)
Turkey - Spring	1/2 hour before sunrise to 4 p.m.

SHOOTERS & HUNTERS: HELP PREVENT WILDFIRES.

The target shooting and hunting community prides itself on being safe and responsible with firearms in all situations—from using them outdoors to storing them safely at home. Sometimes, however, unusual conditions such as extremely dry environments require an extra level of awareness and safety on the part of shooters.

Wildfires have many possible causes. The National Shooting Sports Foundation, the trade association for the firearms and ammunition industry, reminds all shooters that during dry and hot weather conditions their use of certain ammunition and targets could accidentally ignite a wildfire. NSSF reminds all target shooters and hunters, as well as other outdoor enthusiasts, to consider the potential consequences of their activities in fire-prone environments.

- **Make it a point to know the regulations and rules related to shooting in areas experiencing dry and hot conditions, whether on public or private land or at shooting ranges. Many national forests, for example, do not allow recreational shooting when fire restrictions are in effect.**
- **Consider the type of ammunition and targets you are using. Minimize the risk of fires by not using steel-jacketed ammunition, ammunition with steel-core components, tracer rounds or exploding targets in fire-prone areas.**
- **Remember that equipment, such as cars and ATVs, can have extremely hot exhaust systems that could ignite dry vegetation, so park only in designated areas.**
- **Extinguish and dispose of smoking materials safely.**
- **Follow guidelines to extinguish campfires.**
- **Warn others of potential dangers and behaviors for starting wildfires.**
- **Report any wildfire you see to authorities.**
- **Spread this message to other target shooters, hunters and outdoor enthusiasts.**
